 through 1969 motorcycle scooter or moped equipped with a Wipac electrical system Wipac issued two ring bound versions of  
 this manual The first was titled Number 3 Manual and the second Motorcycle Scooter Manual but unfortunately the  
 publication dates of the individual pages were not identified However based on the contents we can estimate that they were  
 published in 1964 and 1969 approximately The later manual contains considerably more information plus numerous updates  
 to the data in the earlier manual Unfortunately some of the information from the earlier manual was also omitted from the  
 later manual as it was probably considered to be outdated However as that outdated information is of significant interest to  
 today s owners and restorers we have combined the entire data from both manuals into a single publication Please note that  
 wherever the earlier data had been updated we have only included the latest update in order to prevent duplication of  
 information This combination manual includes alternator and generator testing and servicing instructions spare parts  
 illustrations and part numbers plus Technical Data Sheets and Service Bulletins that provide additional information due to  
 model updates and or electronic equipment modifications It also includes wiring diagrams by individual model type including

 entire content of this publication is devoted to the operation testing servicing maintenance overhaul and adjustment of all the  
 major Wipac electrical components utilized by the various manufacturers listed above Out of print and unavailable for many  
 years these manuals are extremely difficult to find on the secondary market and we are pleased to be able to offer this
