Research Companion to Building Information Modeling Lu, Weisheng, Anumba, Chimay J., 2022-03-22 Offering critical insights to the state of the art in Building Information Modeling BIM research and development this book outlines the prospects and challenges for the field in this era of digital revolution Analysing the contributions of BIM across the construction industry it provides a comprehensive survey of global BIM practices Construction Digitalisation Douglas Aghimien, Clinton Aigbavboa, Ayodeji Oke, Wellington Thwala, 2021-07-25 This book explores construction digitalisation particularly in developing countries The book conceptualises a digitalisation capability maturity model that will enable

construction organisations to self assess and benchmark their digital capabilities in their quest for digital transformation Digitalisation offers a significant solution to the age long problems of the construction industry Research shows that when construction organisations transform from a traditional service delivery approach to a more digitalised approach significant improvement in project delivery and better competitive advantage for these organisations will be attained The attainment of these benefits is evident in developed countries where the digitalisation of construction activities continues apace Unfortunately the story is not the same for construction organisations in developing economies While some organisations might be willing to be digitally transformed most have no clue how to go about it To this end this book provides guidelines for construction organisations seeking to transform their entities digitally Its content is a valuable read for construction company owners as it provides a model which they can use in the digitalisation of their activities Also regulatory bodies in the construction industry can adopt the capabilities identified in the book as essential prerequisites for their members Furthermore the book serves as excellent theoretical background reading for management researchers seeking to expand their knowledge on the digitalisation of the construction industry and other associated industries Computational and Experimental Methods in Mechanical Engineering Veeredhi Vasudeva Rao,Adepu Kumaraswamy,Sahil Kalra,Ambuj Saxena,2021-08-30 This book includes selected peer reviewed papers presented at third International Conference on Computational and Experimental Methods in Mechanical Engineering held in June 2021 at G L Bajaj Institute of Technology and Management Greater Noida U P India The book covers broad range of topics in latest research including hydropower heat transfer fluid mechanics advanced manufacturing recycling and waste disposal solar energy thermal power plants refrigeration and air conditioning robotics automation and mechatronics and advanced designs The authors are experienced and experts in their field and all papers are reviewed by expert reviewers in respective field The book is useful for industry peoples faculties and research scholars Banaras Reconstructed Madhuri Desai,2017-06-27 Between the late sixteenth and early twentieth centuries Banaras the iconic Hindu center in northern India that is often described as the oldest living city in the world was reconstructed materially as well as imaginatively and embellished with temples monasteries mansions and ghats riverfront fortress palaces Banaras s refurbished sacred landscape became the subject of pilgrimage maps and its spectacular riverfront was depicted in panoramas and described in travelogues In Banaras Reconstructed Madhuri Desai examines the confluences as well as the tensions that have shaped this complex and remarkable city In so doing she raises issues central to historical as well as contemporary Indian identity and delves into larger questions about religious urban environments in South Asia Architectural Publications Index ,1998 *First Fuel: India's Energy Efficiency Journey and a Radical Vision for Sustainability* Padu Padmanabhan,2021-07-23 A vital read Saurabh Kumar Executive Vice Chairman Energy Efficiency Services Ltd Group Authoritative Arunabha Ghosh CEO Council on Energy Environment and Water India A must read Ashok Sarkar Senior energy specialist World Bank The historic oil crisis of 1973 which permanently altered

significant economic policies worldwide marked a turning point in India's energy odyssey putting the country on the path towards energy efficiency. A young energy researcher at the National Productivity Council at the time Padu Padmanabhan soon found himself at a juncture that would lead him to the many watershed moments of this journey. Drawing on his extensive subsequent experience at the United States Agency for International Development in India and the World Bank Padu takes us from the Nehruvian years of idealism through the five decade long quest for fuel efficiency and energy conservation that ultimately paved the way for the shift towards energy efficient practices. Simple yet highly effective energy efficiency has come to be known as our first fuel, an inexhaustible source of energy that may be one of the most viable means of combating the consequences of climate change and the indiscriminate use of natural resources. Through lessons gleaned from the implementation of past energy efficient technology Padu shows us how this fuel can be harnessed for a sustainable future. First Fuel is an invaluable account for not only energy sector professionals but anyone interested in understanding what it takes to achieve energy efficiency and why we need to urgently adopt such practices. It recommends vital policy and regulatory changes and in so doing presents a radical new vision for energy and all its users living in the most critical of times.

Muddassir Quamar, 2025-06-30 COVID 19 pandemic dramatically disrupted the people and politics globally and the Middle East and North Africa MENA region was no exception. Although the pandemic affected all countries there were noticeable variations in its impact and management. The economies in the Gulf Jordan Egypt Morocco Tunisia and Israel heavily reliant on global trade services and tourism suffered serious setbacks. In contrast countries experiencing instability such as Iran Iraq Syria Yemen and Libya faced different kinds of challenges due to ongoing economic political and social turmoil. The volume delves into how all the MENA countries were affected and responded to the COVID 19 pandemic. It explores the role of religion internal and external politics and international organisations that shaped the responses of these countries. The volume analyses 20 countries across the MENA region featuring extensive tables and figures to illustrate its findings. While aiming for academic rigor the volume adopts a simple yet systemic approach to examine more than a dozen factors to understand the impact of the unprecedented global crisis in a crucial region.
