Kuta Transformational Geometry:

Spatial Intelligence Daniel Ness, Stephen J. Farenga, Salvatore G. Garofalo, 2017-05-12 Spatial Intelligence examines public and professional conceptions of the relationships between thinking about spatial attributes and active engagement in spatially related constructions and designs Even though children s and adolescents spatial propensities in constructive activities parallel the skills needed by professionals in both established and emerging fields spatial education is often missing from K 12 curricula and is easily impeded by teachers parents or other individuals who do not provide contexts in formalized settings such as schools to nurture its potential This book bridges the gap by linking the natural spatial inclinations interests and proclivities of individuals from a variety of cultures with professional training and expertise in engineering architecture science and mathematics Educators will be better able to achieve the skills and awareness necessary to provide children and young adults with the vital opportunities inherent in spatial education *Sona Geometry* Paulus Gerdes, 1994 **Boron**
