Scott Hunter,2004-01-01 This high school classroom supplement to the main biology text prepares students in New York State to succeed on the Regents Exam It presents a subject review practice questions with answers and two complete Regents Biology Exam with answer keys When combined with Barron's Regents Exams and Answers Biology it provides students with the most comprehensive test preparation available anywhere Topics reviewed include ecology biological organization formation and structure of the ecosystem and the interaction between human beings and the biosphere *Making Connections in Elementary and Middle School Social Studies* Andrew P. Johnson,2006 Making Connections in Elementary and Middle School Social Studies is based on the idea that students learn more and are more motivated to learn when they are able to connect their own knowledge observations ideas imagination and emotions with the content at hand This book demonstrates how personal connections can be incorporated into social studies education while meeting NCSS thematic pedagogical and disciplinary standards It is written in a very direct reader friendly style Each chapter describes a variety of practical strategies and creative activities that novice and experienced teachers can use to make social studies more interesting and to help students make meaningful personal and academic connections Each chapter contains a wealth of classroom strategies pedagogical techniques activities and lesson plan ideas that can be used to enhance learning and make lessons more interesting active and student centered The book covers the three types of standards that elementary and middle school teachers work with as they teach social studies o Thinking Ahead questions invite the reader to reflect on his/her own experiences as they relate to the material covered in the next chapter These can be used as discussion points for a class or small group or simply as pre reading prompts to enhance comprehension o Teachers in Action boxes contain real life narratives from practicing teachers These cases are designed to expand upon key issues presented in each chapter Every case is accompanied by the author's personal reflection on the case These reflections are intended to give the reader an opinion against which he/she can measure his/her own reactions After each case the reader is prompted to think about the narrative presented and think about the way that his/her reactions compare with those presented by the author o Go There boxes provide links to Web sites that offer additional resources for teachers lesson plans and other activities to enhance a social studies classroom This text is accompanied by a dynamic Instructor's Resources CD The CD includes classroom video footage that can be shown in class to illustrate the concepts presented in the book and stimulate class discussion *Urbanization and Affordances that Promote Well-Being for (Urban) People and for a Healthy Biosphere* Stephan Barthel,Marketta Kyttä,2020-01-30 The world is urbanizing at an unprecedented rate It is estimated that in the near future urban landscapes for another ca 2.7 billion people will be built on planet Earth approximately converting land equivalent to the size of South Africa Such land conversion coupled with citizen

densification increasing in equalities shifting diets and emerging technologies challenge human well being and pose ever increasing demand for resources generated by the Biosphere This Research Topic concentrates on the various ways urbanization can promote individual well being mental physical and social health as well as ecological health a healthy Biosphere What kind of affordances for human health promotion can urbanization include What kinds of affordances for a psychological connection with nature can urbanization include What kinds of nudges for pro environmental behavior and consumption decreasing detrimental consumption behaviors can be actively designed in urban settings The Research Topic at hand uses a transactional approach where an affordance can be understood as a non deterministic in situ precondition for a human activity enabled by relations between abilities of an individual with features of an environment We encourage a broad definition of the concept of affordances where the environment must not be restricted to the material biophysical environment alone but also could be combined with social immaterial features We see that the transactional approach of this Research Topic posits that meaning arises in relations between humans and their environment that it will be equally applicable to natural and designed environments and that it doesn t regard dichotomies like city contra nature or social contra ecological Hence this Research Topic is interested in if the transactional approach can be used as a conceptual tool not only for promotion of mental physical and social health in cities but simultaneously for unraveling relations at the micro scale in cities which can be used for solutions that also promote a healthy Biosphere

Architectural Exaptation Alessandro Melis, Telmo Pievani, Jose Antonio Lara-Hernandez, 2024-03-29 *Architectural Exaptation* When Function Follows Form focuses on the significance and the originality of the study of exaptation It presents exaptation as an opportunity to extend architectural design towards more sustainable approaches aimed at enforcing urban resilience The use of exaptation s definition in architecture supports the heuristic value of cross disciplinary studies on biology and architecture which seem even more relevant in times of global environmental crises This book aims to make a critique of the pre existing and extensive paternalistic literature Exaptation will be described as a functional shift of a structure that already had a prior but different function In architecture a functional shift of a structure that already had a function may apply to forms of decorative elements embedded in architectural components and to both change of function of tectonic elements and the change of use of an architectural space The book is illustrated with examples from around the globe including China Italy Mexico New Zealand the USA and the UK and looks at different civilizations and diverse historical periods ranging from the urban to the architectural scale Such examples highlight the potential and latent human creative capacity to change the use and functions something that cities and buildings could consider when facing disturbances Exaptation is shown as an alternative narrative to the simplifications of evolutionary puritanism It also offers an innovative perspective and presents an opportunity to rethink the manner in which we design and redesign our cities This book will be of interest to architecture planning urban design and biology researchers and students Winner of the Gerd Albers Award 2024 This award is for the best book

contribution in the field of Urban Planning and is awarded by International Society of City and Regional Planners ISOCARP
