Discrete Optimization I ,2000-04-01 Discrete Optimization I Continuous Nonlinear Optimization for Engineering Applications in GAMS Technology Neculai Andrei,2017-12-04 This book presents the theoretical details and computational performances of algorithms used for solving continuous nonlinear optimization applications imbedded in GAMS Aimed toward scientists and graduate students who utilize optimization methods to model and solve problems in mathematical programming operations research business engineering and industry this book enables readers with a background in nonlinear optimization and linear algebra to use GAMS technology to understand and utilize its important capabilities to optimize algorithms for modeling and solving complex large scale continuous nonlinear optimization problems or applications Beginning with an overview of constrained nonlinear optimization methods this book moves on to illustrate key aspects of mathematical modeling through modeling technologies based on algebraically oriented modeling languages Next the main feature of GAMS an algebraically oriented language that allows for high level algebraic representation of mathematical optimization models is introduced to model and solve continuous nonlinear optimization applications More than 15 real nonlinear optimization applications in algebraic and GAMS representation are presented which are used to illustrate the performances of the algorithms described in this book Theoretical and computational results methods and techniques effective for solving nonlinear optimization problems are detailed through the algorithms MINOS KNITRO CONOPT SNOPT and IPOPT which work in GAMS technology *A View of Operations Research Applications in Italy, 2018* Mauro Dell'Amico,Manlio Gaudioso,Giuseppe Stecca,2019-09-10 This book presents expert descriptions of the successful application of operations research in both the private and the public sector including in logistics transportation product design production planning and scheduling and areas of social interest Each chapter is based on fruitful collaboration between researchers and companies and company representatives are among the co authors The book derives from a 2017 call by the Italian Operations Research Society AIRO for information from members on their activities in promoting the use of quantitative techniques and in particular operations research techniques in society and industry A booklet based on this call was issued for the annual AIRO conference but it was felt that some of the content was of such interest that it deserved wider dissemination in more detailed form This book is the outcome It equips practitioners with solutions to real life decision problems offers researchers examples of the practical application of operations research methods and provides Master s and PhD students with suggestions for research development in various fields *Stochastic and Statistical Methods in Hydrology and Environmental Engineering* Keith W. Hipel,2012-12-06 Objectives The current global environmental crisis has

reinforced the need for developing flexible mathematical models to obtain a better understanding of environmental problems so that effective remedial action can be taken. Because natural phenomena occurring in hydrology and environmental engineering usually behave in random and probabilistic fashions, stochastic and statistical models have major roles to play in the protection and restoration of our natural environment. Consequently, the main objective of this edited volume is to present some of the most up to date and promising approaches to stochastic and statistical modelling especially with respect to groundwater and surface water applications.

Contents As shown in the Table of Contents, the book is subdivided into the following main parts: GENERAL ISSUES, PART I, PART II, GROUNDWATER, PART III, SURFACE WATER, PART IV, STOCHASTIC OPTIMIZATION, PART V, MOMENT ANALYSIS, PART VI, OTHER TOPICS. Part I raises some thought provoking issues about probabilistic modelling of hydrological and environmental systems. The first two papers in Part I are in fact keynote papers delivered at an international environmetrics conference held at the University of Waterloo in June 1993 in honour of Professor T. E. Unny. In his keynote paper, Dr S. J. Burges of the University of Washington places into perspective the historical and future roles of stochastic modelling in hydrology and environmental engineering. Additionally, Dr Burges stresses the need for developing a sound scientific basis for the field of hydrology.
