

National Mathematics Advisory Panel

Final Report: March 13, 2008

“There is not a sufficient number of studies with children of various ages and grades to draw strong conclusions about schooling and mathematical development, but the research that has been conducted thus far suggests a similar pattern, that is, decreased involvement of the prefrontal/working memory regions and increased involvement of the angular gyrus with increasing grade level and mathematical experience”.

Author (March 8, 2008). DRAFT Task Group Reports of the National Mathematics Advisory Panel: Report of the Task Group on Learning Processes. From:
