Heinemann Maths 3: Home Link-Up, 1997 This component of the Heinemann Mathematics series offers a strategy for home support of children's work in school. Whilst consolidating all aspects of the curriculum, the photocopiable homework activities also provide opportunities for children to use and apply their maths in problem solving activities. The activities provide practice of key skills and techniques, are clearly linked to specific pages in the textbooks and workbooks, allowing for easy integration with class work. NCERT Workbook Mathematics III

Chandan Sengupta, This workbook is designed to equip students of class 3 of different curriculum framework for enabling them to acquire desired level of mathematical skills as per the standards prescribed for that particular level. This workbook contains some activity sheets and reference worksheets suitable for the students of Grade 3. It is also suitable for aspirants preparing for Olympiads and other such enrichment activities. Answer sheets with explanations are there in a separate sheet. It will enable parents and teachers for organizing the task in a better way. I am confident enough about the competence of fellow students having willingness to move up to the final stage of the Mathematics Enrichment Activities of various stages. There are different worksheets in accord to the time of studies that can be assigned to the fellow student. Answers are in a separate sheet, paper that can be kept at different place. Parents and teachers use this book of activities to develop interest of students on mathematical as well as analytical skills. For Students We expect a kind of understanding from students of Grade 3 of the National Curriculum. The fellow student should understand the number system and related operations. There are some relationships exist in between number systems of various types. We often come across four different number system in computer Science. For the class works and mathematical operations of Grade 4 we restrict our discussion to decimal system only. I hope the kind of effort and combination of problems might enhance the knowledge base of our fellow students. For Parents Questions are there without respective answers. It can be obtained from the source. There exists a plan of fulfilling dual purpose of the effort. These sets can be utilized to engage a student for working out the possible outputs without being inflicted primarily with answers. If answers are provided alongside the questions then the material will fulfill half of the purpose. It cannot be contingent for overcoming the problems and also cannot facilitate in skill enhancement efforts. Set of questions can be used for the purpose of assessing skill acquisition process and also can be assigned to the ward by parents and guide. Chandan Sukumar Sengupta Author Year 7 Maths Fiona C.
