Handbook of Probabilistic Models Pijush Samui, Dieu Tien Bui, Subrata Chakraborty, Ravinesh Deo, 2019-10-05
Handbook of Probabilistic Models carefully examines the application of advanced probabilistic models in conventional engineering fields. In this comprehensive handbook, practitioners, researchers, and scientists will find detailed explanations of technical concepts, applications of the proposed methods, and the respective scientific approaches needed to solve the problem. This book provides an interdisciplinary approach that creates advanced probabilistic models for engineering fields ranging from conventional fields of mechanical engineering and civil engineering to electronics, electrical, earth sciences, climate, agriculture, water resource, mathematical sciences, and computer sciences. Specific topics covered include minimax, probability, machine regression, stochastic finite element method, relevance vector machine, logistic regression, Monte Carlo simulations, random matrix, Gaussian process regression, Kalman filter, stochastic optimization, maximum likelihood, Bayesian inference, Bayesian update, kriging, copula, statistical models, and more. Explains the application of advanced probabilistic models encompassing multidisciplinary research. Applies probabilistic modeling to emerging areas in engineering. Provides an interdisciplinary approach to probabilistic models and their applications, thus solving a wide range of practical problems.

Forming the Future Glenn Daehn, Jian Cao, Brad Kinsey, Erman Tekkaya, Anupam Vivek, Yoshinori Yoshida, 2021-07-10
In this collection, scientists and engineers from across industry, academia, and government present their latest improvements and innovations in all aspects of metal forming science and technology with the intent of facilitating linkages and collaborations among these groups. Chapters cover the breadth of metal forming topics from fundamental science to industrial application.

Handbook of Multimedia Information Security: Techniques and Applications Amit Kumar Singh, Anand Mohan, 2019-07-19
This handbook is organized under three major parts. The first part of this handbook deals with multimedia security for emerging applications. The chapters include basic concepts of multimedia tools and applications, biological and behavioral biometrics, effective multimedia encryption, and secure watermarking techniques for emerging applications, an adaptive face identification approach for Android mobile devices, and multimedia using chaotic and perceptual hashing functions. The second part of this handbook focuses on multimedia processing for various potential applications. The chapter includes a detailed survey of image processing-based automated glaucoma detection techniques and the role of denoising. Recent study of dictionary learning-based image reconstruction techniques for analyzing the big medical data, brief introduction of quantum image processing and its applications, a segmentation-less efficient Alzheimer detection approach, object recognition, image enhancements, and denoising techniques for emerging applications, improved performance of image compression approach, and automated detection of eye-related diseases using digital image processing. The third part of this handbook introduces multimedia applications. The chapter includes the extensive survey on the role of multimedia in medicine and multimedia forensics, classification, a finger-based authentication system for e-health security, analysis of

recently developed deep learning techniques for emotion and activity recognition Further the book introduce a case study on change of ECG according to time for user identification role of multimedia in big data cloud computing the Internet of things IoT and blockchain environment in detail for real life applications This handbook targets researchers policy makers programmers and industry professionals in creating new knowledge for developing efficient techniques framework for multimedia applications Advanced level students studying computer science specifically security and multimedia will find this book useful as a reference

Handbook of Research on 5G Networks and Advancements in Computing, Electronics, and Electrical Engineering Nwajana, Augustine O., Ihianle, Isibor Kennedy, 2021-06-25 The advent of the emerging fifth generation 5G networks has changed the paradigm of how computing electronics and electrical CEE systems are interconnected CEE devices and systems with the help of the 5G technology can now be seamlessly linked in a way that is rapidly turning the globe into a digital world Smart cities and internet of things have come to stay but not without some challenges which must be discussed The Handbook of Research on 5G Networks and Advancements in Computing Electronics and Electrical Engineering focuses on current technological innovations as the world rapidly heads towards becoming a global smart city It covers important topics such as power systems electrical engineering mobile communications network security and more This book examines vast types of technologies and their roles in society with a focus on how each works the impacts it has and the future for developing a global smart city This book is ideal for both industrial and academic researchers scientists engineers educators practitioners developers policymakers scholars and students interested in 5G technology and the future of engineering computing and technology in human society

Disruptive Technologies and Optimization Towards Industry 4.0 Logistics Athanasia Karakitsiou, Athanasios Migdalas, Panos M. Pardalos, 2024-07-24 This contributed volume guides researchers and practitioners on resource collaborative management of supply chains and manufacturing enterprises within an industrial internet technological environment The book comprises 10 chapters that cover two major topics in the subject of logistics 4.0 namely the utilization of both disruptive technologies and optimization techniques in smart logistic management With global research on the book's topic expanding rapidly across various directions and disciplines it provides a structured framework for international experts to showcase outstanding work and unique approaches Researchers and students will find the comprehensive outline on collaborative optimization and management of smart manufacturing and production warehousing inventory logistics transportation integrated supply chain and supply network within the industrial internet platform a beneficial guide to understanding current and future practical problems that arise in manufacturing and supply chain management
