foods infiltrated your kitchen you ll love this entertaining romp through the secret military history of practically everything you buy at the supermarket In a nondescript Boston suburb in a handful of low buildings buffered by trees and a lake a group of men and women spend their days researching testing tasting and producing the foods that form the bedrock of the American diet If you stumbled into the facility you might think the technicians dressed in lab coats and the shiny kitchen equipment belonged to one of the giant food conglomerates responsible for your favorite brand of frozen pizza or microwavable breakfast burritos So you d be surprised to learn that you ve just entered the U S Army Natick Soldier Systems Center ground zero for the processed food industry Ever since Napoleon armies have sought better ways to preserve store and transport food for battle As part of this quest although most people don t realize it the U S military spearheaded the invention of energy bars restructured meat extended life bread instant coffee and much more But there s been an insidious mission creep because the military enlisted industry huge corporations such as ADM ConAgra General Mills Hershey Hormel Mars Nabisco Reynolds Smithfield Swift Tyson and Unilever to help develop and manufacture food for soldiers on the front line over the years combat rations or the key technologies used in engineering them have ended up dominating grocery store shelves and refrigerator cases TV dinners the cheese powder in snack foods cling wrap The list is almost endless Now food writer Anastacia Marx de Salcedo scrutinizes the world of processed food and its long relationship with the military unveiling the twists turns successes failures and products that have found their way from the armed forces and contractors laboratories into our kitchens In developing these rations the army was looking for some of the very same qualities as we do in our hectic fast paced twenty first century lives portability ease of preparation extended shelf life at room temperature affordability and appeal to even the least adventurous eaters In other words the military has us chowing down like special ops What is the effect of such a diet eaten as it is by soldiers and most consumers day in and day out year after year We don t really know We re the guinea pigs in a giant public health experiment one in which science and technology at the beck and call of the military have taken over our kitchens

Packaging for Nonthermal Processing of Food Melvin A. Pascall, Jung H. Han, 2018-02-20 A comprehensive review of the many new developments in the growing food processing and packaging field Revised and updated for the first time in a decade this book discusses packaging implications for recent nonthermal processing technologies and mild food preservation such as high pressure processing irradiation pulsed electric fields microwave sterilization and other hurdle technologies It reviews typical nonthermal processes the characteristics of food products after nonthermal treatments and packaging parameters to preserve the quality and enhance the safety of the products In addition the critical role played by packaging materials during the development of a new nonthermal processed product and how the package is used to make the product attractive to consumers is discussed Packaging for Nonthermal Processing of Food Second Edition provides up to date assessments of consumer attitudes to nonthermal processes and novel packaging both in the U S and Europe It offers a brand new chapter covering smart packaging including thermal microbial

chemical and light sensing biosensors radio frequency identification systems and self heating and cooling packaging There is also a new chapter providing an overview of packaging laws and regulations in the United States and Europe Covers the packaging types required for all major nonthermal technologies including high pressure processing pulsed electric field irradiation ohmic heating and others Features a brand new chapter on smart packaging including biosensors thermal microbial chemical and light sensing radio frequency identification systems and self heating and cooling packaging Additional chapters look at the current regulatory scene in the U S and Europe as well as consumer attitudes to these novel technologies Editors and contributors bring a valuable mix of industry and research experience Packaging for Nonthermal Processing of Food Second Edition offers many benefits to the food industry by providing practical information on the relationship between new processes and packaging materials to academia as a source of fundamental knowledge about packaging science and to regulatory agencies as an avenue for acquiring a deeper understanding of the packaging requirements for new processes

Microwave Processing of Foods: Challenges, Advances and Prospects Anubhav Pratap Singh, Ferruh Erdogdu, Shaojin Wang, Hosahalli S. Ramaswamy, 2024-08-27 The application of microwaves has been a major advancement in food processing over the past 50 years and yet to date there have been very few publications focusing exclusively on microwave processing and none covering the latest technological and theoretical advances Microwave Processing of Foods Challenges Advances and Prospects fills this gap by covering all aspects of the microwave processing of foods including the latest novel advances in this fast moving subject area This text presents multidisciplinary views of novel microwave systems novel process modeling engineering and design as well as practical approaches on methodology and findings regarding the effect of microwave on the food quality and process safety The volume comprises several chapters on the newest processing and machinery aspects engineering design and process modeling process safety and novel processes based on full or partial application of microwave in food processing This book also considers economic aspects food quality issues and future trends of microwave application in the food industry Each chapter in this text functions as a critical review presenting the current state of knowledge based on the personal experience of the authors and the current state of published research in one particular area of food processing While the main focus is on processing the physical principles and the chemical and microbiological basis of the process are also covered plus the impact of the technology on the quality and safety of food This book presents a comprehensive and fully up to date reference on the principles and applications of microwave processing of food products

Edible Films and Coatings Maria Pilar Montero Garcia, M. Carmen Gómez-Guillén, M. Elvira López-Caballero, Gustavo V. Barbosa-Cánovas, 2016-09-19 The search for better strategies to preserve foods with minimal changes during processing has been of great interest in recent decades Traditionally edible films and coatings have been used as a partial barrier to moisture oxygen and carbon dioxide through selective permeability to gases as well as improving mechanical handling properties The advances in this area have been breathtaking and in fact their implementation in the

industry is already a reality Even so there are still new developments in various fields and from various perspectives worth reporting Edible Films and Coatings Fundamentals and Applications discusses the newest generation of edible films and coatings that are being especially designed to allow the incorporation and or controlled release of specific additives by means of nanoencapsulation layer by layer assembly and other promising technologies Covering the latest novelties in research conducted in the field of edible packaging it considers state of the art innovations in coatings and films novel applications particularly in the design of gourmet foods new advances in the incorporation of bioactive compounds and potential applications in agronomy an as yet little explored area which could provide considerable advances in the preservation and quality of foods in the field
