Evaluating Research for Evidence-Based Nursing

Practice Jacqueline Fawcett, Joan Garity, 2008-08-22 Where is the evidence in a nursing research study What is the evidence How good is the evidence And how is it relevant to providing evidence based nursing care Ensure that students can meet the AACN's American Association of Colleges of Nursing goal of identifying valid research findings and using them to determine if they are providing care that is supported by evidence

Integrated Water Resources Management in Practice

Roberto Lenton, 2012-08-21 Better water management will be crucial if we are to meet many of the key challenges of this century feeding the world's growing population and reducing poverty meeting water and sanitation needs protecting vital ecosystems all while adapting to climate change The approach known as Integrated Water Resources Management IWRM is widely recognized as the best way forward but is poorly understood even within the water sector Since a core IWRM principle is that good water management must involve the water users the understanding and involvement of other sectors is critical for success There is thus an urgent need for practical guidance for both water and development professionals based on real world examples rather than theoretical constructs That is what this book provides Using case studies the book illustrates how better water management guided by the IWRM approach has helped to meet a wide range of sustainable development goals It does this by considering practical examples looking at how IWRM has contributed at different scales from very local village level experiences to reforms at national level and beyond to cases involving trans boundary river basins Using these on the ground experiences from both developed and developing countries in five continents the book provides candid and practical lessons for policy makers donors and water and development practitioners worldwide looking at how IWRM principles were applied what worked and equally important what didn't work and why Published with the Global Water Partnership
