For a long time quality has been the center of attention in the nonprofit sector influenced by all kinds of developments in society Due to among other things the interference of the government and the increasing competition all divisions in the nonprofit sector are obliged to work systematically with their quality Quality has become necessary However as more people gain experience with quality assessments visitations and accreditations so does the criticism This has to do with how quality is assessed and with the criteria that are used We will examine this critically in this book Many questions remain unanswered and contradictions have not been resolved Moreover it is no easy task to have all noses pointing in the same direction In short there is still work to be done This book broadens the traditional vision of quality and quality assurance to a vision and approach that is compatible with the support of the organization's missions in the nonprofit sector Incidentally we will speak of quality development rather than quality assurance The use of the term quality development hopes to inspire people to look differently at quality and how their organization deals with it Furthermore this book provides nonprofit organizations with methodologies and tools that can help in the process of permanent quality development The pursuit of quality for nonprofit

organizations is approached from a development perspective and a broader social context This distinguishes it from the traditional quality management manuals It offers a constructive and appreciative approach that is compatible with the specific mission of various nonprofit organizations such as education health care social work and government The approach is also integral because everyone in the organization as well as the external partners is involved *California.
