Engineering Science to Big Science Pamela Etter Mack,1998 This volume is a collection of 16 essays on the NACA and NASA
aerospace research projects that received the prestigious Robert J Collier Trophy From NACA achievements such as the
Whitcomb Area Rule and the NACA Engine Cowling to NASA landmarks such as the first Space Shuttle flight and the Hubble
Space Telescope s first servicing mission this book covers a variety of important NACA NASA achievements We recommend it
highly for all students interested in aerospace history **Resources in Education** ,1990 Practical Guide for the
Manufacture of Paper and Boards Albert Prouteaux,1866 How We Teach Science John L. Rudolph,2019-06-01 A former
Wisconsin high school science teacher makes the case that how and why we teach science matters especially now that its
legitimacy is under attack Why teach science The answer to that question will determine how it is taught Yet despite the
enduring belief in this country that science should be taught there has been no enduring consensus about how or why This is
especially true when it comes to teaching scientific process Nearly all of the basic knowledge we have about the world is rock
solid The science we teach in high schools in particular laws of motion the structure of the atom cell division DNA replication
the universal speed limit of light is accepted as the way nature works Everyone also agrees that students and the public more
generally should understand the methods used to gain this knowledge But what exactly is the scientific method Ever since
the late 1800s scientists and science educators have grappled with that question Through the years they ve advanced an
assortment of strategies ranging from the laboratory method to the five step method to science as inquiry to no method at all
How We Teach Science reveals that each strategy was influenced by the intellectual cultural and political circumstances of
the time In some eras learning about experimentation and scientific inquiry was seen to contribute to an individual s
intellectual and moral improvement while in others it was viewed as a way to minimize public interference in institutional
science John Rudolph shows that how we think about and teach science will either sustain or thwart future innovation and
ultimately determine how science is perceived and received by the public **Page's Engineering Weekly** ,1906
