engineer s best source for answers to realistic aircraft design questions The book has been expanded to provide design
guidance for additional classes of aircraft including seaplanes biplanes UAS high speed business jets and electric airplanes In
addition to conventional powerplants design guidance for battery systems electric motors and complete electric powertrains
is offered The second edition contains new chapters Thrust Modeling for Gas Turbines Longitudinal Stability and Control
Lateral and Directional Stability and Control These new chapters offer multiple practical methods to simplify the estimation
of stability derivatives and introduce hinge moments and basic control system design Furthermore all chapters have been
reorganized and feature updated material with additional analysis methods This edition also provides an introduction to
design optimization using a wing optimization as an example for the beginner Written by an engineer with more than 25
years of design experience professional engineers aircraft designers aerodynamicists structural analysts performance
analysts researchers and aerospace engineering students will value the book as the classic go to for aircraft design The
printed book is now in color with 1011 figures and illustrations Presents the most common methods for conceptual aircraft
design Clear presentation splits text into shaded regions separating engineering topics from mathematical derivations and
examples Design topics range from the new 14 CFR Part 23 to analysis of ducted fans All chapters feature updated material
with additional analysis methods Many chapters have been reorganized for further help Introduction to design optimization is
provided using a wing optimization as an example for the beginner Three new chapters are offered two of which focus on
stability and control These offer multiple practical methods to simplify the estimation of stability derivatives The chapters

introduce hinge moments and basic control system design Real world examples using aircraft such as the Cirrus SR 22 and Learjet 45 Modern workshop practice, as applied to marine, land, and locomotive engines [&c.]. John G. Winton,1889
