Anderson,2020-01-10 Who s afraid of for profit education Those who work in non profit or government owned and operated schools Many parents and other stakeholders have been made fearful by this education establishment What s more important to humans nutrition or education Nutrition is more important because it is the prerequisite for other human activities including education What organizations provide food and who pays for the food Food is provided by for profit farmers for profit processors for profit wholesalers and for profit retailers Most food is purchased with the consumers own money but a significant amount is purchased by low income individuals using food stamps Why can t education be provided similarly using education stamps We trust for profit enterprises to provide our food Why can t we trust for profit enterprises to provide K 12 education Fearmongers have frightened us and made us into gullible compliant socialists who despise commercial activities in education Go to the supermarket and ponder its marvelous array of foods and then contemplate how a for profit K 12 education sector would please and amaze its customers *Where the Hell is Middle America?* Terrence Stone,2024-08-31 Are you tired of the political discord between the two major political parties and feel a deep rift among the electorate Well the author does and dives into our current divisive political climate and its impact on our social climate And he places much of the blame on our politicians for this disharmony While self identifying as fiscally conservative but more socially liberal the author previously felt he was a lifelong moderate Republican However he has become disenchanted with the GOP of late He examines many of the typically divisive topics that often distinguish Republicans and Democrats Exploring other political parties was also enlightening and now realizes he is more moderate centrist than previously thought Today s politicians often pander to their extremist ends rarely considering the middle third of the electorate that identify as moderate If a formidable moderate centrist candidate could wrest away the dominance of the two major parties by providing some competition it could force the Republican and Democratic politicians to act better After all competition in the marketplace can help bring down prices for our betterment wouldn t more competition in the political arena also be for our betterment The author shows that some middle ground may be met by offering some simple solutions to often complex political topics If

more of the electorate could lean towards the middle further away from the far right and left extremist ends then we could gain additional support for more moderate major party candidates or even prevalent third party candidates Shuttered Schools Ebony M. Duncan-Shippy, 2019-04-01 Since the late 1990s mass school closures have reshaped urban education across the United States Popular media coverage and research reports link this resurgence of school closures in major cities like Chicago and Philadelphia to charter school expansion municipal budget deficits and racial segregation However this phenomenon is largely overlooked in contemporary education scholarship Shuttered Schools Race Community and School Closures in American Cities Information Age Publishing is an interdisciplinary volume that integrates multiple perspectives to study the complex practice of school closure an issue that transcends education Academics practitioners activists and policymakers will recognize the far reaching implications of these decisions for school communities Shuttered Schools features rigorous new studies of school closures in cities across the United States This research contextualizes contemporary school closures and accounts for their disproportionate impact on African American students With topics ranging from gentrification and redevelopment to student experiences with school loss research presented in this text incorporates various methods e g case studies interviews regression techniques and textual analysis to evaluate the intended and unintended consequences of closure for students families and communities This work demonstrates that shifts in the social economic and political contexts of education inform closure practice in meaningful ways The impacts of shuttering schools are neither colorblind nor class neutral but indeed interact with social contexts in ways that reify existing social inequalities in education
