created mathematics education knowledge      Posing and Solving Mathematical Problems Patricio Felmer, Erkki Pehkonen, Jeremy Kilpatrick, 2016-04-29 This book collects recent research on posing and solving mathematical problems. Rather than treating these two crucial aspects of school mathematics as separate areas of study, the authors approach them as a unit where both areas are measured on equal grounds in relation to each other. The contributors are from a vast variety of countries and with a wide range of experience it includes the work from many of the leading researchers in the area and an important number of young researchers. The book is divided in three parts: one directed to new research perspectives and the other two directed to teachers and students respectively.

*The Ends Game* Marco Bertini, Oded Koenigsberg, 2022-01-11 How companies like Dollar Shave Club and Rent the Runway rewrite the rules of commerce by pursuing outcomes rather than products and services. The seventh book in the Management on the Cutting Edge series for business professionals looking to do deliver excellent customer service while maximizing value and revenue. Would you rather pay for healthcare or for better health? For school or education? For groceries or nutrition? A car or transportation? A theater performance or entertainment? In *The Ends Game* Marco Bertini and Oded Koenigsberg describe how some firms are rewriting the rules of commerce instead of selling the means: their products and services. They adopt innovative revenue models to pursue ends: actual outcomes. They examine companies such as Dollar Shave Club, Rent the Runway, Netflix, Spotify, Michelin, Adobe, Pearson, and many more. They show that paying by the pill, semester food item, vehicle, or show does not necessarily reflect the value that customers actually derive from their purchases. Revenue models anchored on the ownership of products they argue are patently inferior.
