## The History of Ants

Ants are insects that we find everywhere. They may be in your home, under your school desk, in the bathroom or in the grass during a picnic. There are more than 12,000 types of ants all around the world.

In a colony there are three types of ants. These are the queen, the males and the female workers. A colony can also have more than one queen. The male ants and the queen both have wings, but workers don't. Soldier ants protect the queen ant and the colony. They also collect food and take care of the colony.

The job of the queen ant is to lay eggs for the rest of her life. Some queen ants can live up to several years and have million babies! When the queen of the ant colony dies, the colony does not survive for long.

Ants don't have ears; they listen to the vibrations through their little feet. Ants breathe through tiny holes in their entire body because they don't have lungs like us human beings. When ants are looking for food, they leave chemical trails so that they know where all they have already been.

Did you know that an ant can lift 20 times its own weight? This means that if a second grade student was an ant, they would be able to pick up a car!

**Answer the following questions:**

1. **What do the soldier ants do?** \_\_\_\_\_

Children's Reading and Mathematics Achievement in Kindergarten and First Grade Kristin Denton, Kristin Denton Flanagan, Jerry West, 2002 This report is the third in a series based on findings about young children s early experiences with school from the Early Childhood Longitudinal Study Kindergarten Class of 1998 99 ECLS K Sponsored by the U S Department of Education National Center for Education Statistics the ECLS K study selected a nationally representative sample of kindergartners in the fall of 1998 and is following these children through the spring of their fifth grade year The study collects information

directly from the children their families teachers and schools This report looks at children s school performance during first grade in terms of their reading and mathematical knowledge and skills by relating them to child family and school characteristics The report finds that some of the differences in children s reading and mathematics knowledge and skills by child family and school characteristics that are present as they enter kindergarten persist into the spring of their kindergarten and spring of their first grade year For example poor children consistently score below the national average in both reading and mathematics across the kindergarten year and into the spring of first grade These findings also suggest differences that are beginning to emerge by children s sex By spring of first grade females are more likely to be reading understanding words in context whereas males are more likely be proficient at advanced mathematics multiplication and division However some differences do seem to wane For example in both reading and mathematics Hispanic children s scores tend to move upward toward the national mean over these two school years The longitudinal nature of the ECLS K will enable researchers to track these differences in terms of children s third and fifth grade reading and mathematics performance The report also notes that children who bring certain knowledge and skills with them to kindergarten are likely to be at an advantage in classroom learning compared to peers who do not possess such resources The descriptive analyses of the report show that children who have specific cognitive knowledge and skills are read to frequently possess positive approaches to learning and enjoy very good or excellent general health perform better in reading and mathematics than those without these resources Includes data and standard error tables Appended is a table of regression coefficients for the relationship between children s resources and skills to their spring kindergarten and spring first grade reading performance Contains 18 references HTH      *English Solved Papers* YCT Expert Team , 2023 24 UPTET CTET English Solved Papers
