History Paper Memo September 2014 North West:

Secrecy, Law and Society Greg Martin, Rebecca Scott Bray, Miiko Kumar, 2015-05-08 Commentators have shown how a culture of security ushered in after the terrorist attacks of 11 September 2001 has involved exceptional legal measures and increased recourse to secrecy on the basis of protecting public safety and safeguarding national security In this context scholars have largely been preoccupied with the ways that increased security impinges upon civil liberties While secrecy is justified on public interest grounds there remains a tension between the need for secrecy and calls for openness transparency and disclosure In law secrecy has implications for the separation of powers due process and the rule of law raising fundamental concerns about open justice procedural fairness and human rights Beyond the counterterrorism and legal context scholarly interest in secrecy has been concerned with the credibility of public and private institutions as well as the legacies of secrecy across a range of institutional and cultural settings By exploring the intersections between secrecy law and society this volume is a timely and critical intervention in secrecy debates traversing various fields of legal and social inquiry It will be a useful resource for academic researchers university teachers and students as well as law practitioners and policymakers interested in the legal and socio legal dimensions of secrecy The Routledge History of the Modern Maritime World since 1500 Kenneth Morgan, 2025-05-01 The Routledge History of the Modern Maritime World since 1500 provides a wide ranging set of chapters covering the sixteenth century to the present which represent the main lines of current enquiry in maritime history Over the past half century maritime history has become a significant sub field of historical research that intersects with broader historical concerns such as oceanic history global patterns of production and consumption and the maritime heritage industry Informed by original research an engagement with current historiographical concerns and a global geographical reach the book is divided into sections covering shipping ports merchants and trade maritime environments coastal zones and the human dimension Chapters focus on different countries across different ranges of time and also with different methodological approaches The six sections of this book show the significant areas central to the study and understanding of the modern maritime world and collectively they highlight the areas in which the themes pursued by maritime historians have advanced and are currently moving This book will appeal to various academic audiences students will find chapters dealing with major topics in maritime history that will help them in their courses for professional scholars in history archaeology heritage studies historical sociology and economics chapters outline some of the latest research in the field New Destinations of Empire Emily Mitchell-Eaton, 2024-11-01 In 1986 the Compact of Free Association marked the formal end of U S colonialism in the Republic of the Marshall Islands while simultaneously re entrenching imperial power dynamics between the two countries The U S RMI Compact at once enshrined exclusive U S military access to the islands and established the right of visa free migration to the United States for Marshallese citizens leading to a Marshallese diaspora whose largest population resettled in the seemingly unlikely destination of Springdale

Arkansas An all white town by design for much of the twentieth century Springdale having nearly quadrupled in population since 1980 has been remade by Marshallese as well as Latinx immigration Through ethnographic policy based and archival research in Gu han Saipan Hawai i Arkansas and Washington D C *New Destinations of Empire* tells the story of these place based transformations revealing how U S empire both causes and constrains mobility for its subjects shaping migrants experiences of racialization citizenship and belonging in new destinations of empire In examining two spatial processes imperialism and migration together Emily Mitchell Eaton reveals connections and flows between presumably distant remote sites like Arkansas and the Marshall Islands showing them to be central to the United States most urgent political issues immigration racial justice militarization and decolonization

Once and Future Partners William C. Potter, Sarah Bidgood, 2018-10-09 Despite their Cold War rivalry the United States and the Soviet Union frequently engaged in joint efforts to prevent the spread of nuclear weapons Leaders in Washington and Moscow recognized that nuclear proliferation would serve neither country s interests even when they did not see eye to eye in many other areas They likewise understood why collaboration in mitigating this nuclear danger would serve both their own interests and those of the international community This volume examines seven little known examples of US Soviet cooperation for non proliferation including preventing South Africa from conducting a nuclear test developing international safeguards and export control guidelines and negotiating a draft convention banning

radiological weapons It uses declassified and recently digitized archival material to explore in depth the motivations for and modalities for cooperation under often adverse political circumstances Given the current disintegration of Russian and US relations including in the nuclear sphere this history is especially worthy of review Accordingly the volume s final chapter is devoted to discussing how non proliferation lessons from the past can be applied today in areas most in need of US Russian cooperation

Davies, Shaun Collin, 2020-08-27 Skyscrapers Hide the Heavens J.R. Miller, 2018-03-01 First published in 1989

Skyscrapers Hide the Heavens continues to earn wide acclaim for its comprehensive account of Native newcomer relations throughout Canada's history. Author J.R. Miller charts the deterioration of the relationship from the initial mutually beneficial contact in the fur trade to the current displacement and marginalization of the Indigenous population. The fourth edition of Skyscrapers Hide the Heavens is the result of considerable revision and expansion to incorporate current scholarship and developments over the past twenty years in federal government policy and Aboriginal political organization. It includes new information regarding political organization, land claims in the courts, public debates, as well as the haunting legacy of residential schools in Canada. Critical to Canadian university-level classes in history, Indigenous studies, sociology, education, and law, the fourth edition of Skyscrapers will also be useful to journalists and lawyers, as well as leaders of organizations dealing with Indigenous issues. Not solely a text for specialists in post-secondary institutions, Skyscrapers Hide the Heavens explores the consequence of altered Native newcomer relations from cooperation to coercion and the lasting legacy of this impasse.

Fascism or Whatever You Want to Call It Saladdin Bahoze, 2025-04-21

Fascism or Whatever You Want to Call It constructs a crucial framework for diagnosing and exposing fascist ideologies and movements in whatever historical and geographical circumstances or disguises they may appear. At no point in history have so many people been subjected to the rule or threat of fascist movements. Nor have power and privilege ever been so concentrated in the hands of a few. We are living in the age of the decline of bourgeois liberalism and the rise of something much less democratic, something sectarian, extremist, militaristic, and exclusionary, which should be called fascism. Because fascism deploys endless camouflaging strategies, a critical theory for diagnosing and analyzing it is desperately needed. That is what this book offers. Arguing against conventional approaches that use the European model of the 1930s as a yardstick, Bahoze conceptualizes fascism as a form rather than a system of power and ideology.

Tainted Earth Marianne Sullivan, 2014-01-23

Smelting is an industrial process involving the extraction of metal from ore. During this process, impurities in ore, including arsenic, lead, and cadmium, may be released from smokestacks, contaminating air, water, and soil with toxic heavy metals. The problem of public health harm from smelter emissions received little official attention for much of the twentieth century. Though people living near smelters periodically complained that their health was impaired by both sulfur dioxide and heavy metals, for much of the century there was strong deference to industry claims that smelter operations were a nuisance and not a serious threat to health. It was only when the majority of children living near the El Paso Texas smelter were discovered to be lead-exposed in the early 1970s that systematic independent investigation of exposure to heavy metals in smelting communities began. Following El Paso, an even more serious lead poisoning epidemic was discovered around the Bunker Hill smelter in northern Idaho. In Tacoma, Washington, a copper smelter exposed children to arsenic, a carcinogenic threat. Thoroughly grounded in extensive archival research, Tainted Earth traces the rise of public health concerns about nonferrous smelting in the western

United States focusing on three major facilities Tacoma Washington El Paso Texas and Bunker Hill Idaho Marianne Sullivan documents the response from community residents public health scientists the industry and the government to pollution from smelters as well as the long road to protecting public health and the environment Placing the environmental and public health aspects of smelting in historical context the book connects local incidents to national stories on the regulation of airborne toxic metals The nonferrous smelting industry has left a toxic legacy in the United States and around the world Unless these toxic metals are cleaned up they will persist in the environment and may sicken people children in particular for generations to come The twentieth century struggle to control smelter pollution shares many similarities with public health battles with such industries as tobacco and asbestos where industry supported science created doubt about harm and reluctant government regulators did not take decisive action to protect the public's health
