Hurricane Manuel Effects:

The Effects of Eastern North Pacific Tropical Cyclones on the Southwestern United States Walter Smith, 1986

Elementary Ninja Luis Estalim Guzman Gonzalez, SDGs in the Americas and Caribbean Region Walter Leal Filho, Noé Aguilar-Rivera, Bruno Borsari, Paulo R. B. de Brito, Baltazar Andrade Guerra, 2023-08-31 This volume provides an overview of the ways sustainable development issues as a whole and the SDGs in particular are perceived and practiced in a variety of countries in the Latin America and Caribbean region. It also discusses the extent to which its many socio economic problems hinder progress towards the pursuit of a sustainable future and documents successful experiences from across the region. This book is part of the 100 papers to accelerate the implementation of the UN Sustainable Development Goals initiative.

Managing Uncertainty in Crisis Xiaoli Lu, 2017-11-07 This book studies the variety of organizational strategies selected to cope with critical uncertainties during crises. This research formulates and applies an institutional sense making model to explain the selection of strategies for coping with uncertainties during crises to answer the question why some organizations select a rule based strategy to cope with uncertainties whereas others pursue a more ad hoc based strategy. It finds that the level of institutionalization does not affect strategy selection in the initial phase of responding to crises that three rigidity effects can be identified in the selection of sense making strategies once organizations have faced the failure of their selected strategies that discontinuities in the feedback loop of sense making do not necessarily move organizations to switch their sense making strategies but interact with institutionalization to contribute to switching sense making strategies. This book bridges the gap between institutional thinking and crisis management theorizing. A major step forward in the world of crisis management studies. Professor Arjen Boin, Leiden University, the Netherlands. In a world of increasingly complex sociotechnical systems interacting in high risk environments. Professor Lu's analysis of how organizations manage uncertainty is both timely and profound. Professor Louise K Comfort, Director, Center for Disaster Management, University of Pittsburgh, USA. Prof Lu greatly enhances our understanding of how organizations cope with uncertainty and make sense of their challenges under the pressures of catastrophe. Dr Arnold M Howitt, Faculty Co Director, Program on Crisis Leadership, Harvard Kennedy School, USA. This book provides not only a theory of crisis management but also a key concept around which research and practice can be conducted. Professor Naim Kapucu, Director of School of Public Administration, University of Central Florida, USA. A generic institutional model for analyzing and managing hazards, disasters and crises worldwide. Professor Joop Koppenjan, Erasmus University, Rotterdam, the Netherlands. This book has done an excellent job in opening the black box of how organizations make sense of the crisis situations they face and develop strategies to respond. It should be read by all of us who wish for a peaceful and safe world. Professor Lan Xue, Dean of School of Public Policy and Management, Tsinghua University, China. **The Oryx Resource Guide to El Niño and La Niña** Bloomsbury Publishing, 2002-05-30 Fish die, Seagulls starve, Economies wither. And that's just in the coastal villages. El Niño. The Christ Child and its climatological

opposite La Niña are global events so powerful and strange they virtually have personalities. Many remember the El Niño seasons of 1982-83 and 1997-98 which brought floods, tornadoes, droughts, and snow to unusual locales. Increased study of these Tropical Pacific phenomena, also known as ENSO (the El Niño and Southern Oscillation), has now enabled scientists to predict the ENSO state as much as 12 to 18 months in advance and has helped to shape weather prediction in general. Here the basic causes and effects of El Niño and La Niña are carefully chronicled for anyone in search of accurate and current information on these natural phenomena. Chapters are devoted to the history of ENSO, its influence on global weather and on the United States, including the ecosystem, and how governments and industries worldwide are utilizing new weather data to harness ENSO's economic impact rather than be saddled by it. A chronology tours key events from the 15th-century diary observations of colonists in Ecuador and Peru to recent events like the devastating El Niño of 1997-98, which was responsible for 23,000 deaths and \$33 billion in damages. Biographies of important researchers, illustrations, and maps, and an extensive bibliography help make this a total guide to these magnificent natural cycles. **AgExporter**, 2000. *Evaluación de los impactos del huracán George's sobre el agua y el suelo en la República Dominicana. Informe de viaje del 2 al 10 de diciembre de 1998*, **Disaster Upon Disaster**. Susanna M. Hoffma, Roberto E. Barrios, 2019-10-03. A consistent problem that confronts disaster reduction is the disjunction between academic and expert knowledge and policies and practices of agencies mandated to deal with the concern. Although a great deal of knowledge has been acquired regarding many aspects of disasters, such as driving factors, risk, construction, complexity of resettlement, and importance of people's culture, very little has become protocol and procedure. *Disaster Upon Disaster* illuminates the numerous disjunctions between the suppositions, realities, agendas, and executions in the field. It goes on to detail contingencies, predicaments, old and new plights, and finally advances solutions toward greatly improved outcomes. **Powerless**. Diana Hernández, Jennifer Laird, 2025-04-08. Energy serves as the lifeblood of our daily experiences. It permeates virtually every aspect of our existence, facilitating nourishment, safety, and productivity. When affordability threatens energy's availability, a family's living situation can become untenable: too cold, too hot, too dark, and too often unhealthy and unsafe. In *Powerless*, sociologists Diana Hernández and Jennifer Laird reveal the hidden hardship of energy insecurity: the inability to adequately meet household energy needs. Approximately one in ten households in the U.S. are energy insecure, and four in ten are at risk for energy insecurity. These statistics alone do not convey the acute pain of utility shutoffs or the relentless toll of chronic energy hardships marked by difficult choices and harsh living conditions. Drawing on survey data and interviews with one hundred energy-insecure individuals and families, Hernández and Laird detail the experience of energy insecurity. Individuals and families suffering from energy insecurity endure economic hardships such as difficulty paying utility bills, utility debt, and disconnection from utility services. They also struggle with physical challenges such as poor housing conditions and poor or dysfunctional heating and cooling systems. They are often forced to make difficult choices about what bills to pay. These decisions are sometimes referred to as heat or

eat choices as families cannot afford to pay for heating and food at the same time Energy insecure individuals and families employ a variety of strategies to keep energy costs down to avoid having to make these hard choices This includes deliberate underconsumption of energy enduring physical discomfort and using dangerous alternatives such as open flames ovens or space heaters to try to maintain a comfortable temperature in their home To be energy insecure is to suffer Despite the heavy toll of energy insecurity most people confront these difficulties behind closed doors believing it is a private matter Thus the enormous social crisis of energy insecurity goes unnoticed Hernandez and Laird argue that household energy is a basic human right and detail policies and practices that would expand access to consistent safe clean and affordable energy Their proposals include improving the current energy safety net which is limited and often does not serve the most energy insecure due to stringent program requirements and administrative burdens They also suggest redesigning rates to accommodate income promoting enrollment and expansion of discount programs reforming utility disconnection policies improving energy literacy and ensuring an equitable shift to renewable energy resources Powerless creates a comprehensive picture of the complex social and environmental issue of energy insecurity and shows how energy equity is not just an aspiration but an achievable reality
