The Economics of Renewable Energy in the Gulf Hisham M. Akhonbay, 2018-09-27 The Cooperation Council for the Arab States of the Gulf GCC has been at the epicenter of global energy markets because of its substantial endowment of hydrocarbons Yet countries in the region have also stated their intent to be global leaders in renewable energy This collection explores the drivers for the widespread adoption of renewable energy around the GCC the need for renewable energy and the policy economic factors that can create success All six countries within the GCC have plans to include renewable energy power generation in their energy mix for various reasons including a growing demand for electricity because of increasing populations an increasing government fiscal deficit due to inefficient subsidies the need to diversify the economy and global pressure to meet climate change requirements However the decision of when and by how much to introduce renewable energy is fraught with complications In this book a stellar cast of regional policy and academic experts explore the reasons behind these renewable energy plans and the potential impediments to success whether it be the declining cost of producing energy from hydrocarbons an infrastructure which needs to be updated social acceptance lack of financing and even harsh weather Weighing up all these factors the book considers the route forward for renewable energy in the Gulf region The Economics of Renewable Energy in the Gulf offers an excellent examination of the adoption of renewable energy in the area It will be of great interest to academic researchers and policy makers alike particularly those working in the areas of energy economics public policy and international relations

Co-treatment of Septage and Faecal Sludge in Sewage Treatment Facilities Dorai Narayana, 2020-04-15 Over the past few years on site sanitation has been widely promoted as a solution which can be quickly implemented to address sanitation issues and it is gaining traction As such treatment of the contents emptied from on site containments has become a pressing issue While dedicated treatment facilities for this purpose have been advocated co treating these wastes in sewage treatment facilities is a promising option which many countries have implemented or are exploring This option maximises the utilisation of city infrastructure In cases where the existing sewage treatment facilities are underutilised co treatment presents a ready solution for managing fecal sludge and septage In spite of co treatment being a well known practice in many countries it remains clouded in uncertainty especially regarding the technical advisability and potential risks of co treating fecal sludge or septage in sewage treatment plants Planners and decision makers are often very apprehensive in considering co treatment As a result the opportunity to better utilise available infrastructure for co treatment of sludge is often being missed Meanwhile there are also many cases where co treatment has been tried either successfully or otherwise but it has not been possible to draw conclusions from these to guide the way forward This guide book explores some of the basic principles behind sewage treatment and how it may be impacted by co treatment of wastes from on site containments to try to throw some light on how co treatment could be considered in an incremental manner recognising risks and mitigating them It is intended to facilitate a better understanding among planners

engineers decision makers and technical practitioners and to help them evaluate and consider the option of co treatment
