License to Spill Rachel Plotnick, 2025-04-29 How everyday wetness from finger smudges sweat and spilled drinks to showering and swimming collides with consumers media devices designed to stay dry License to Spill investigates the everyday moments activities and spaces where media technologies and liquids collide from disastrous spilled drinks that corrode laptops and drops in the toilet that drown smartphones to the greasy finger smudges and sweat droplets that sully screens and glitch smartwatches Putting historical and present day case studies in conversation Rachel Plotnick considers how people's experiences with media devices inevitably encounter wetness and yet consumers not the companies who make the devices take the blame when leaks spillages and overflows occur Along with thinking about preventive measures and device caretaking License to Spill examines how water resistant and waterproofed technologies through their design and marketing imagine the brawniest and hardest of users meant to punish and abuse their tough devices granting them unfettered permission to get wet Examining a long history of torture testing and hyperbolic claims of imperviousness the book demonstrates how protective designs relate to broader cultural ideas about media use as sporty luxurious excessive or messy This context is especially relevant given that the market for water resistant bags cases coatings and seals has flourished over the past decade with new rhetoric about wetness as natural and digital technologies as ever present The book pushes us to attend to both the ideals and problems that arise when designing resilient devices ranging from the right to repair movement and lawsuits over ingress protection IP ratings to obsolescence culture and work from home activities in the wake of the COVID 19 pandemic Home Power ,2005 Plunkett's Renewable, Alternative & Hydrogen Energy Industry Almanac Jack W. Serious Microhydro Scott Davis, 2010-10-12 From water to wire harnessing the energy of running water **Inventory of Nonutility Electric Power Plants in the United States 2000** , **International Corporate 1000 Yellow Book J.** Carr, J. Daniel, P. Isbell, M. Williams, 2012-12-06 **Profits and Sustainability** Geoffrey Jones, 2018-01-26 Are profits and sustainability compatible This book brings unique perspectives to this key debate by exploring the history of green entrepreneurship since the nineteenth century and its spread globally in industries including renewable energy organic food natural beauty ecotourism recycling architecture and finance The book uses the lens of the extraordinary and often eccentric men and women who defied convention and imagined that business could help save the planet rather than consume it The social and religious beliefs that drove many of these individuals are explored as the book looks at how they overcame huge obstacles to execute their strategies The green entrepreneurs seen here are shown to have created new markets and industries and driven innovations in sustainable practices even at times when most consumers and governments marginalized the entire subject The struggles of early pioneers appear to have been rewarded by the growth of environmental awareness among consumers business leaders and others in recent years but the Earth's environmental health continues to deteriorate If profits and sustainability have proved challenging to reconcile the book argues that one reason was how they were both defined **Metal-Reinforced Ceramics** Andrew J. Ruys, 2020-11-07 Metal Reinforced Ceramics covers the principle of metal fiber reinforced ceramics a well known topic in the field of reinforced concrete Much of the work that has been done has remained unpublished hidden in industrial company archives due to the commercial sensitivity associated with the respective technologies that prevailed at the time which no longer applies today This book will discuss advanced technologies that have largely been undocumented before in a broad range of industrial application areas with updates on alumina silicon carbide boron carbide tungsten carbide fused silica and carbon based ceramics which are hard
