## **Linking Enterprise Data:**

*Linking Enterprise Data* David Wood, 2010-11-10 Enterprise data is growing at a much faster rate than traditional technologies allow. New enterprise architectures combining existing technologies are desperately needed. This book suggests a way forward by applying new techniques of the World Wide Web to enterprise information systems. *Linking Enterprise Data* is an edited volume contributed by worldwide leaders in Semantic Web and Linked Data research, standards development and adoption. Linking enterprise data is the application of World Wide Web architecture principles to real world information management issues faced by commercial not for profit and government enterprises. This book is divided into four sections: Benefits of applying Linked Data principles in enterprise settings; enterprise approval and support of Linked Data projects; specific Linked Data techniques; and a number of real world success stories from early enterprise adopters. *Linking Enterprise Data* targets professionals working as CTOs, CIOs, enterprise architects, project managers and application developers in commercial not for profit and government organizations concerned with scalability, flexibility and robustness of information management systems. Computer science graduate students and researchers focusing on enterprise information integration will also benefit.

**Big, Open and Linked Data** Krzysztof Węcel, 2022-09-24 This book examines the recent evolution of the concept of data as an economic and managerial phenomenon. The author first describes and discusses open data and then introduces the concept of linked data with a focus on assets for reuse. Furthermore, he addresses the main challenges of big data. Value is identified as the main incentive for the adoption of linked data. Accordingly, the next two chapters study sources of data value from a macroeconomic and micro economic perspective respectively. This contributes to the systematization of important issues at the crossroads of enterprise data and data sharing: data ownership, personal data and data privacy. In turn, the book reveals the role of innovation as a main vehicle for creating

value by unifying big open and linked data It studies the ways in which value can be created transferred and captured in the form of business models before the closing chapter verifies the data unification model by combining open and linked geographical data with big data from a major telecom company

**The Semantic Web - ISWC 2010** Peter F. Patel-Schneider, Yue Pan, Pascal Hitzler, Peter Mika, Lei Zhang, Jeff Z. Pan, Birte Glimm, Ian Horrocks, 2011-01-04 The two volume set LNCS 6496 and 6497 constitutes the refereed proceedings of the 9th International Semantic Web Conference ISWC 2010 held in Shanghai China during November 7 11 2010 Part I contains 51 papers out of 578 submissions to the research track Part II contains 18 papers out of 66 submissions to the semantic Web in use track 6 papers out of 26 submissions to the doctoral consortium track and also 4 invited talks Each submitted paper were carefully reviewed The International Semantic Web Conferences ISWC constitute the major international venue where the latest research results and technical innovations on all aspects of the Semantic Web are presented ISWC brings together researchers practitioners and users from the areas of artificial intelligence databases social networks distributed computing Web engineering information systems natural language processing soft computing and human computer interaction to discuss the major challenges and proposed solutions the success stories and failures as well the visions that can advance research and drive innovation in the Semantic Web

*Linking Government Data* David Wood, 2011-11-12 Linking Government Data provides a practical approach to addressing common information management issues The approaches taken are based on international standards of the World Wide Web Consortium Linking Government Data gives both the costs and benefits of using linked data techniques with government data describes how agencies can fulfill their missions with less cost and recommends how intra agency culture must change to allow public presentation of linked data Case studies from early adopters of linked data approaches in international governments are presented in the last section of the book Linking Government Data is designed as a professional book for those working in Semantic Web research and standards development and for early adopters of Semantic Web standards and techniques Enterprise architects project managers and application developers in commercial not for profit and government organizations concerned with scalability flexibility and robustness of information management systems will also find this book valuable Students focused on computer science and business management will also find value in this book

Linked Data in Linguistics Christian Chiarcos, Sebastian Nordhoff, Sebastian Hellmann, 2012-02-21 The explosion of information technology has led to substantial growth of web accessible linguistic data in terms of quantity diversity and complexity These resources become even more useful when interlinked with each other to generate network effects The general trend of providing data online is thus accompanied by newly developing methodologies to interconnect linguistic data and metadata This includes linguistic data collections general purpose knowledge bases e g the DBpedia a machine readable edition of the Wikipedia and repositories with specific information about languages linguistic categories and phenomena The Linked Data paradigm provides a framework for interoperability and access management and thereby

allows to integrate information from such a diverse set of resources The contributions assembled in this volume illustrate the band width of applications of the Linked Data paradigm for representative types of language resources They cover lexical semantic resources annotated corpora typological databases as well as terminology and metadata repositories The book includes representative applications from diverse fields ranging from academic linguistics e g typology and corpus linguistics over applied linguistics e g lexicography and translation studies to technical applications in computational linguistics Natural Language Processing and information technology This volume accompanies the Workshop on Linked Data in Linguistics 2012 LDL 2012 in Frankfurt M Germany organized by the Open Linguistics Working Group OWLG of the Open Knowledge Foundation OKFN It assembles contributions of the workshop participants and beyond this it summarizes initial steps in the formation of a Linked Open Data cloud of linguistic resources the Linguistic Linked Open Data cloud LLOD

**Semantic Technologies in Idea Management Systems: A Model for Interoperability, Linking and Filtering**, Idea Management Systems are web applications that implement the notion of open innovation through crowdsourcing Typically organizations use those kind of systems to connect to large communities in order to gather ideas for improvement of products or services Originating from simple suggestion boxes Idea Management Systems advanced beyond collecting ideas and aspire to be a knowledge management solution capable to select best ideas via collaborative as well as expert assessment methods In practice however the contemporary systems still face a number of problems usually related to information overflow and recognizing questionable quality of submissions with reasonable time and effort allocation This thesis focuses on idea assessment problem area and contributes a number of solutions that allow to filter compare and evaluate ideas submitted into an Idea Management System With respect to Idea Management System interoperability the thesis proposes theoretical model of Idea Life Cycle and formalizes it as the Gi2MO ontology which enables to go beyond the boundaries of a single system to compare and assess innovation in an organization wide or market wide context Furthermore based on the ontology the thesis builds a number of solutions for improving idea assessment via community opinion analysis MARL annotation of idea characteristics Gi2MO Types and study of idea relationships Gi2MO Links The main achievements of the thesis are application of theoretical innovation models for practice of Idea Management to successfully recognize the differentiation between communities opinion metrics and their recognition as a new tool for idea assessment discovery of new relationship types between ideas and their impact on idea clustering Finally the thesis outcome is establishment of Gi2MO Project that serves as an incubator for Idea Management solutions and mature open source software alternatives for the widely available commercial suites From the academic point of view the project delivers resources to undertake experiments in the Idea Management Systems area and managed to become a forum that gathered a number of academic and industrial partners

Semantics Empowered Web 3.0 Amit Sheth, Krishnaprasad Thirunarayan, 2022-05-31 After the traditional document centric Web 1.0 and user generated content focused Web 2.0 Web 3.0 has become a repository of an ever growing variety of

Web resources that include data and services associated with enterprises social networks sensors cloud as well as mobile and other devices that constitute the Internet of Things These pose unprecedented challenges in terms of heterogeneity variety scale volume and continuous changes velocity as well as present corresponding opportunities if they can be exploited Just as semantics has played a critical role in dealing with data heterogeneity in the past to provide interoperability and integration it is playing an even more critical role in dealing with the challenges and helping users and applications exploit all forms of Web 3 0 data This book presents a unified approach to harness and exploit all forms of contemporary Web resources using the core principles of ability to associate meaning with data through conceptual or domain models and semantic descriptions including annotations and through advanced semantic techniques for search integration and analysis It discusses the use of Semantic Web standards and techniques when appropriate but also advocates the use of lighter weight easier to use and more scalable options when they are more suitable The authors extensive experience spanning research and prototypes to development of operational applications and commercial technologies and products guide the treatment of the material Table of Contents Role of Semantics and Metadata Types and Models of Semantics Annotation Adding Semantics to Data Semantics for Enterprise Data Semantics for Services Semantics for Sensor Data Semantics for Social Data Semantics for Cloud

Computing Semantics for Advanced Applications      **Linked Enterprise Data** Tassilo Pellegrini,Harald Sack,Sören Auer,2014-10-30 Betriebliches Informations und Wissensmanagement steht zunehmend vor der Herausforderung verteilte Datenbestände zusammenzuführen und sinnvoll zu vernetzen Hierbei gewinnen vor allem Semantic Web Technologien und darauf basierende Dienste an Bedeutung Sie unterstützen die Herstellung vernetzter Wissensbasen und vereinfachen den Zugriff auf und die Veröffentlichung von verteilt vorliegenden Datensätzen sowohl innerhalb als auch außerhalb der Unternehmensgrenzen Unter dem Begriff Linked Enterprise Data demonstriert der vorliegende Band wie Semantic Web Technologien in einer Organisation sinnvoll zum Einsatz gebracht werden können um Mehrwert aus bestehenden Informationsbeständen zu generieren und die Fülle an qualitativ hochwertigen Datenquellen im World Wide Web für Produkt und Service Innovationen zu nutzen      **Linked Data and User Interaction** H. Frank Cervone,Lars G. Svensson,2015-07-01

This collection of research papers provides extensive information on deploying services concepts and approaches for using open linked data from libraries and other cultural heritage institutions With a special emphasis on how libraries and other cultural heritage institutions can create effective end user interfaces using open linked data or other datasets These papers are essential reading for anyone interesting in user interface design or the semantic web      **Linked Open Data --**

**Creating Knowledge Out of Interlinked Data** Sören Auer,Volha Bryl,Sebastian Tramp,2014-07-31 Linked Open Data LOD is a pragmatic approach for realizing the Semantic Web vision of making the Web a global distributed semantics based information system This book presents an overview on the results of the research project LOD2 Creating Knowledge out of Interlinked Data LOD2 is a large scale integrating project co funded by the European Commission within the FP7 Information

and Communication Technologies Work Program Commencing in September 2010 this 4 year project comprised leading Linked Open Data research groups companies and service providers from across 11 European countries and South Korea The aim of this project was to advance the state of the art in research and development in four key areas relevant for Linked Data namely 1 RDF data management 2 the extraction creation and enrichment of structured RDF data 3 the interlinking and fusion of Linked Data from different sources and 4 the authoring exploration and visualization of Linked Data

**Real-time Linked Dataspaces** Edward Curry, 2019-11-18 This open access book explores the dataspace paradigm as a best effort approach to data management within data ecosystems It establishes the theoretical foundations and principles of real time linked dataspace as a data platform for intelligent systems The book introduces a set of specialized best effort techniques and models to enable loose administrative proximity and semantic integration for managing and processing events and streams The book is divided into five major parts Part I Fundamentals and Concepts details the motivation behind and core concepts of real time linked dataspace and establishes the need to evolve data management techniques in order to meet the challenges of enabling data ecosystems for intelligent systems within smart environments Further it explains the fundamental concepts of dataspace and the need for specialization in the processing of dynamic real time data Part II Data Support Services explores the design and evaluation of critical services including catalog entity management query and search data service discovery and human in the loop In turn Part III Stream and Event Processing Services addresses the design and evaluation of the specialized techniques created for real time support services including complex event processing event service composition stream dissemination stream matching and approximate semantic matching Part IV Intelligent Systems and Applications explores the use of real time linked dataspace within real world smart environments In closing Part V Future Directions outlines future research challenges for dataspace data ecosystems and intelligent systems Readers will gain a detailed understanding of how the dataspace paradigm is now being used to enable data ecosystems for intelligent systems within smart environments The book covers the fundamental theory the creation of new techniques needed for support services and lessons learned from real world intelligent systems and applications focused on sustainability Accordingly it will benefit not only researchers and graduate students in the fields of data management big data and IoT but also professionals who need to create advanced data management platforms for intelligent systems smart environments and data ecosystems

*Exploiting Linked Data and Knowledge Graphs in Large Organisations* Jeff Z. Pan, Guido Vetere, Jose Manuel Gomez-Perez, Honghan Wu, 2017-01-24 This book addresses the topic of exploiting enterprise linked data with a particular focus on knowledge construction and accessibility within enterprises It identifies the gaps between the requirements of enterprise knowledge consumption and standard data consuming technologies by analysing real world use cases and proposes the enterprise knowledge graph to fill such gaps It provides concrete guidelines for effectively deploying linked data graphs within and across business organizations It is divided into three parts focusing on the key

technologies for constructing understanding and employing knowledge graphs Part 1 introduces basic background information and technologies and presents a simple architecture to elucidate the main phases and tasks required during the lifecycle of knowledge graphs Part 2 focuses on technical aspects it starts with state of the art knowledge graph construction approaches and then discusses exploration and exploitation techniques as well as advanced question answering topics concerning knowledge graphs Lastly Part 3 demonstrates examples of successful knowledge graph applications in the media industry healthcare and cultural heritage and offers conclusions and future visions

**Data Science Landscape** Usha Mujoo Munshi, Neeta Verma, 2018-03-01 The edited volume deals with different contours of data science with special reference to data management for the research innovation landscape The data is becoming pervasive in all spheres of human economic and development activity In this context it is important to take stock of what is being done in the data management area and begin to prioritize consider and formulate adoption of a formal data management system including citation protocols for use by research communities in different disciplines and also address various technical research issues The volume thus focuses on some of these issues drawing typical examples from various domains The idea of this work germinated from the two day workshop on Big and Open Data Evolving Data Science Standards and Citation Attribution Practices an international workshop led by the ICSU CODATA and attended by over 300 domain experts The Workshop focused on two priority areas i Big and Open Data Prioritizing Addressing and Establishing Standards and Good Practices and ii Big and Open Data Data Attribution and Citation Practices This important international event was part of a worldwide initiative led by ICSU and the CODATA Data Citation Task Group In all there are 21 chapters with 21st Chapter addressing four different core aspects written by eminent researchers in the field which deal with key issues of S T institutional financial sustainability legal IPR data protocols community norms and others that need attention related to data management practices and protocols coordinate area activities and promote common practices and standards of the research community globally In addition to the aspects touched above the national international perspectives of data and its various contours have also been portrayed through case studies in this volume

**Big Data Computing** Rajendra Akerkar, 2013-12-05 Due to market forces and technological evolution Big Data computing is developing at an increasing rate A wide variety of novel approaches and tools have emerged to tackle the challenges of Big Data creating both more opportunities and more challenges for students and professionals in the field of data computation and analysis Presenting a mix

*Demystifying OWL for the Enterprise* Michael Uschold, 2022-05-31 After a slow incubation period of nearly 15 years a large and growing number of organizations now have one or more projects using the Semantic Web stack of technologies The Web Ontology Language OWL is an essential ingredient in this stack and the need for ontologists is increasing faster than the number and variety of available resources for learning OWL This is especially true for the primary target audience for this book modelers who want to build OWL ontologies for practical use in enterprise and government settings The purpose of this book is to

speed up the process of learning and mastering OWL To that end the focus is on the 30% of OWL that gets used 90% of the time Others who may benefit from this book include technically oriented managers semantic technology developers undergraduate and post graduate students and finally instructors looking for new ways to explain OWL The book unfolds in a spiral manner starting with the core ideas Each subsequent cycle reinforces and expands on what has been learned in prior cycles and introduces new related ideas Part 1 is a cook s tour of ontology and OWL giving an informal overview of what things need to be said to build an ontology followed by a detailed look at how to say them in OWL This is illustrated using a healthcare example Part 1 concludes with an explanation of some foundational ideas about meaning and semantics to prepare the reader for subsequent chapters Part 2 goes into depth on properties and classes which are the core of OWL There are detailed descriptions of the main constructs that you are likely to need in every day modeling including what inferences are sanctioned Each is illustrated with real world examples Part 3 explains and illustrates how to put OWL into practice using examples in healthcare collateral and financial transactions A small ontology is described for each along with some key inferences Key limitations of OWL are identified along with possible workarounds The final chapter gives a variety of practical tips and guidelines to send the reader on their way Advances in Conceptual Modeling Marta Indulska,Sandeep Purao,2014-10-10 This book constitutes the refereed proceedings of workshops held at the 33rd International Conference on Conceptual Modeling ER 2014 in Atlanta GA USA in October 2014 The 24 revised full and 6 short papers were carefully reviewed and selected out of 59 submissions and are presented together with 4 demonstrations The papers are organized in sections related to the individual workshops the First International Workshop on Enterprise Modeling ENMO 2014 the Second International Workshop on Modeling and Management of Big Data MoBiD 2014 the First International Workshop on Conceptual Modeling in Requirements and Business Analysis MReBA 2014 the First International Workshop on Quality of Models and Models of Quality QMMQ 2014 the 8th International Workshop on Semantic and Conceptual Issues in GIS SeCoGIS 2014 and the 11th International Workshop on Web Information Systems Modeling WISM 2014 The contributions cover a variety of topics in conceptual modeling including requirements and enterprise modeling modeling of big data spatial conceptual modeling exploring the quality of models and issues specific to the design of web information systems Case Studies in e-Government 2.0 Imed Boughzala,Marijn Janssen,Saïd Assar,2014-08-29 The goal of this book is to provide a comprehensive multi dimensional approach to research and practice in e government 2 0 implementation Contributions from an international panel of experts apply a variety of methodological approaches and illustrative case studies to present state of the art analysis and perspectives Around the world governments are employing technological advancements to revolutionize their ways of working resulting in changing relationships among public organizations and their constituents Important enablers are new uses of information and knowledge sharing technologies that emerged with the advent of the Web 2 0 paradigm initially used in the private arena such user friendly participatory

intuitive and flexible Web 2.0 technologies e.g. blogs Wikis RSS social networking platforms folksonomy podcasting mashups virtual worlds open linked data etc are increasingly disseminated within the professional sphere regardless of organization type or field of activities Current e government environments have undergone considerable transformations in an attempt to satisfy the incessant demand for more advanced e service delivery better access to information and more efficient government management Looking to the future the emergence of Web 2.0 the rise of social networks and the wider dissemination of data and information are expected to generate many benefits such as a better match between public services and citizens expectations greater adoption of online services by citizens and better control of costs and prevention of delays in the implementation of new services Governments around the world are building frameworks and proposals for e government 2.0 in the hopes of improving participation transparency and integration while speeding up the pace of innovation through collaboration and consultation This volume addresses a gap in the research literature offering timely insights on the e government 2.0 phenomenon and directions for future practice and policy

### **Big Data in Bioeconomy**

Caj Södergård, Tomas Mildorf, Ephrem Habyarimana, Arne J. Berre, Jose A. Fernandes, Christian Zinke-Wehlmann, 2021-08-13

This edited open access book presents the comprehensive outcome of The European DataBio Project which examined new data driven methods to shape a bioeconomy These methods are used to develop new and sustainable ways to use forest farm and fishery resources As a European initiative the goal is to use these new findings to support decision makers and producers meaning farmers land and forest owners and fishermen With their 27 pilot projects from 17 countries the authors examine important sectors and highlight examples where modern data driven methods were used to increase sustainability How can farmers foresters or fishermen use these insights in their daily lives The authors answer this and other questions for our readers The first four parts of this book give an overview of the big data technologies relevant for optimal raw material gathering The next three parts put these technologies into perspective by showing useable applications from farming forestry and fishery The final part of this book gives a summary and a view on the future With its broad outlook and variety of topics this book is an enrichment for students and scientists in bioeconomy biodiversity and renewable resources

Intelligent Methods and Big Data in Industrial Applications Robert Bembenik, Łukasz Skonieczny, Grzegorz Protaziuk, Marzena Kryszkiewicz, Henryk Rybinski, 2018-05-18 The inspiration for this book came from the Industrial Session of the ISMIS 2017 Conference in Warsaw It covers numerous applications of intelligent technologies in various branches of the industry Intelligent computational methods and big data foster innovation and enable the industry to overcome technological limitations and explore the new frontiers Therefore it is necessary for scientists and practitioners to cooperate and inspire each other and use the latest research findings to create new designs and products As such the contributions cover solutions to the problems experienced by practitioners in the areas of artificial intelligence complex systems data mining medical applications and bioinformatics as well as multimedia and text processing Further the book shows new directions for

cooperation between science and industry and facilitates efficient transfer of knowledge in the area of intelligent information systems

### **Linking Enterprise Data Introduction**

In today's digital age, the availability of Linking Enterprise Data books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of Linking Enterprise Data books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of Linking Enterprise Data books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Linking Enterprise Data versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, Linking Enterprise Data books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Linking Enterprise Data books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Linking Enterprise Data books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital

libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Linking Enterprise Data books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of Linking Enterprise Data books and manuals for download and embark on your journey of knowledge?
