Twenty Years of Education Transformation in Gauteng 1994 to 2014 Maringe, Felix, Prew, Martin, 2015-05-05
Twenty Years of Education Transformation in Gauteng 1994 to 2014 An Independent Review presents a collection of 15 important essays on different aspects of education in Gauteng since the advent of democracy in 1994 These essays talk to what a provincial education department does and how and why it does these things whether it be about policy resourcing or implementing projects Each essay is written by one or more specialist in the relevant focus area The book is written to be accessible to the general reader as well as being informative and an essential resource for the specialist reader It sheds light on aspects of how a provincial department operates and why and with what consequences certain decisions have been made in education over the last 20 turbulent years both nationally and provincially There has been no attempt to fit the book's chapters into a particular ideological or educational paradigm and as a result the reader will find differing views on various aspects of the Gauteng Department of Education's present and past We leave the reader to decide to what extent the GDE has fulfilled its educational mandate over the last 20 years **Annual Report** South Africa. Department of Basic Education, 2016

Effects of Government Mandates and Policies on Public Education in Africa, the Caribbean, and the Middle East Cynthia S Sunal, Oluseyi Matthew Odebiyi, Kagendo Mutua, 2022-06-01 As the demand for education at all levels has increased so have the models of meeting these increased demands for education As in many other parts of the world public education has expanded to serve large populations across the regions of Africa the Caribbean and the Middle East Many nations in these regions have instituted mandates policies and frameworks intended to simultaneously increase access to public education opportunities as well as improve the quality of education provided and to address a wide populace Because the increase in educational demand has occurred at all levels these efforts often address various levels of education from early childhood through primary schooling junior secondary and secondary schooling and into tertiary education Efforts also have been made to increase participation in education by marginalized and or special populations The range of efforts is large with some focusing on involving migrants immigrants refugees in primary education while others aim at opening up choices at the university level Recently nations in the region have recognized the possibilities of digital learning online learning as cell phones and other widely used portable wireless devices have made it possible to sell the idea that one can learn from anywhere at any time This widespread access to technology has made it possible for governments as well as private entities to expand learning opportunities even to populations previously unreachable or to address difficult to reach sectors of the population At the same time the population itself has not only increased in numbers but in diversity Maintaining quality through digital and other means of quick expansion of educational opportunities continues to be challenging if not problematic Effects of Government Mandates and Policies on Public Education in Africa the Caribbean and the Middle East is Book IX of the series Research on Education in Africa the Caribbean and the Middle East Chapters

document describe and or raise critical issues and or questions resulting from government policies mandates and frameworks intended to make available public education to an ever growing populace while at the same time being mindful of improving quality of education being availed to an increasingly diverse populace

South African Schooling: The Enigma of Inequality Nic Spaull, Jonathan D. Jansen, 2019-11-05 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90/10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people's future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI

The Education Triple Cocktail Brahm Fleisch, 2018-08-15 The Education Triple Cocktail brings together rigorous quantitative and qualitative research on a new approach to improving foundational teaching and learning for schoolchildren living in working class poor and remote rural communities in resource constrained systems like South Africa At the core of this book is the theory and evidence for a powerful new interlocking and mutually reinforcing change model Inspired by the AIDS treatment story the three pronged approach of structured daily lesson plans appropriate and high quality educational materials and one on one instructional coaching to help teachers transform their instructional practices in early grade classrooms shows that it will improve

learning outcomes For education systems defined by low levels of early grade learning and profoundly unequal outcomes The Education Triple Cocktail offers a theoretically informed evidence based way forward This book will be of immense use to teachers students of Education policymakers and parents **Practical Maths** A.
