Elephant Toothpaste

You will need

- A clean plastic soda bottle
- 1/2 cup 20-volume hydrogen peroxide liquid
- 1 Tablespoon of dry yeast
- 3 Tablespoons of warm water
- Liquid dish washing soap
- Food colouring
- Small cup
- Safety goggles

NOTE: Foam will overflow from the bottle; place the bottle on a tray.

1. Hydrogen peroxide can irritate skin and eyes, so put on those safety goggles and ask an adult to carefully pour the hydrogen peroxide into the bottle.

2. Add 8 drops of your favourite food colouring into the bottle.

3. Add about 1 tablespoon of liquid dish soap into the bottle and swish the bottle around a bit to mix it.

4. In a separate small cup, combine the warm water and the yeast together and mix for about 30 seconds.

5. Now the adventure starts! Pour the yeast water mixture into the bottle (a funnel helps here) and watch the foaminess begin!

Teaching and Learning Online Franklin S. Allaire, Jennifer E. Killham, 2022-04-01 Science is unique among the disciplines since it is inherently hands on. However, the hands on nature of science instruction also makes it uniquely challenging when teaching in virtual environments. How do we as science teachers deliver high quality experiences in an online environment that leads to age grade level appropriate science content knowledge and literacy but also collaborative experiences in the inquiry process and the nature of science? The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners. Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning (Killham et al 2014, Wong et al 2018), PreK-12 teachers consistently report feeling underprepared or overwhelmed by online learning environments (Molnar et al 2021, Seaman et al 2018). This is coupled with persistent challenges related to elementary teachers' lack of confidence and low science teaching self-efficacy (Brigido, Borrachero, Bermejo, Gunning, Duran, Duran 2004). Ideal for undergraduate teacher candidates, graduate students, teacher educators, classroom teachers, parents, and administrators, this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research-based foundation.

The Art of Appraisal Barbara D. Culp, 2017-09-13 The Art of Appraisal saves time and boosts performance with effective tools and a streamlined process. With a few detailed comments, an appraisal can correct weak habits, boost midlevel professionals, and launch excellent teachers into greatness. The Art of Appraisal allows administrators to reap the greatest benefits by creating clarity and efficiency in the process. First, a binary feedback structure ruled by four performance tiers is described. Then, ten key areas of teacher responsibility are defined. Each task is further parsed into four subcategories. Evaluations become faster and easier, and the feedback becomes exponentially more profound. Rich with real world examples and comments about different performance ratings, The Art of Appraisal clarifies and distills the evaluation process. Supplemental chapters are packed with practical comments that can be pasted into evaluations. This structured step by step system was developed by Dr. Culp, an educational professional with over forty years of experience. An invaluable tool for administrators and the teachers they evaluate, The Art of Appraisal allows a school's most effective tool to be used in the most efficient manner.

Developing Independent Learning In Science: Practical Ideas And Activities For 7-12 Year Olds Lakin, Liz, 2013-08-01 This practical guide to promoting and developing independent learning is presented in a mixed format using both diagrammatic and textual stimulus. It offers tips and suggestions to achieve effective teaching and learning and raises standards by enabling the pupil to become independent and responsible for their own learning, autonomous in their thinking and creative and critical in their understanding. Liz Lakin describes a progression away from dependency on the classroom teacher whose role changes readily from teacher to facilitator. Drawing on practice based research, she introduces the skills and processes associated with independent learning through established strategies such as Assessment

The women who served in the Army, Navy, Woman Marines and Coast Guard during World War II ventured into a man's world to stand shoulder to shoulder with them and perform the military duties that brought the war to its end. They were radio operators, aircraft mechanics, storekeepers, nurses, physical therapists, pilots, Link trainer operators, parachute packers, photographers, intelligence analysts, transportation and motor pool operators, and teletypists. They served in Europe, North Africa, the Far East, and on Japanese-occupied islands in the Pacific. Some were killed, others were taken POW. They were not on the peripheries of the war; many were in up to the top of their GI boots fulfilling their assigned duties and all were extremely proud to contribute their skills and support. Here are 53 stories of the nearly 400,000 women veterans who served in World War II.
