

Emergency Department Coding Policy

Emergency department (ED) physicians within each clinical specialty, department, or unit will submit accurate (and fully reflecting) patients' ED diagnoses to the hospital's electronic health record (EHR) system. These diagnoses represent all the conditions or other acute or chronic conditions, injuries or physical ailments and physical and mental disorders, including substance use disorders, that cause, contribute to, or complicate the patient's ED presentation. Each ED diagnosis is verified with the patient's medical history, physical examination, and laboratory and imaging studies, as well as the physician's assessment.

Patients' ED visits are coded using ICD-10-CM. Diagnoses are divided into the following categories: **Primary** (the first diagnosis), **Secondary** (the second diagnosis), **Tertiary** (the third diagnosis), **Quaternary** (the fourth diagnosis), and **Other** (the fifth diagnosis). The primary diagnosis is the condition that caused the patient's ED visit. The secondary diagnosis is the condition that caused the patient's ED visit. The tertiary diagnosis is the condition that caused the patient's ED visit. The quaternary diagnosis is the condition that caused the patient's ED visit. The other diagnosis is the condition that caused the patient's ED visit.

Emergency department physicians are responsible for ensuring that all diagnoses are coded accurately and that the patient's ED visit is coded accurately.
