14 pages | 3483 words

Gary B. Nash's *Race and Revolution* offers an insightful interpretation of the American Revolution which led to the abolishment of slavery in the United States. The book is formed as a group of essays that had sprung from a series of lectures. The text focuses on the failure of the American Revolution to accomplish its initial goals and to do justice to the oppressed race. Nash's thesis in this book is thus that this failure should be blamed actually on the northern leaders rather than the southern ones.

The book peers therefore into the general atmosphere of the Revolution and into the main causes of the failure to fully recognize the African Americans as an equal race. In Nash's view, the hypothesis according to which this failure should be blamed on the inflexibility of the Southerners is not a correct interpretation of the events. Instead, the decline of the initial enthusiasm that inspired the abolitionist movement should be blamed on the growing sense of superiority that prevailed among the Northern leaders.

Thus, Nash's main purpose is to show that the evolution of events during the American Revolution best evinces the relationship between the two diverging races. As the author stresses, the failure to give the blacks true independence and equal rights at that time is not due to the triumph of economic interest over humaneness, but rather to the growing supremacist tendencies of the whites. To demonstrate this hypothesis, Nash organizes his work in three chapters which correspond to the three different stages of abolitionism.

Moreover, the book is supplemented and supported with a series of documents which are also separated according to each of these stages. As Nash proposes, the first stage of the abolitionist movement was one of spreading enthusiasm with regard to the abolition of slavery. During the early 1770's, there was a growing awareness among the colonies of New England with regard to the incompatibility of slavery as an institution with the main precepts and fundamentals of the American nation and of democracy.

Around this time, the leaders as well as the public at large began to regard the problem of slavery from a new angle, realizing that this practice was in stark contradiction with the basic human rights. There was therefore a sense of duplicity of falsity underlying the main principles of the democratic nation. As Nash emphasizes, the idea of abolition was first embraced with great enthusiasm by a majority of the colonists.

As the title of the chapter reads, this generation can be called "the revolutionary generation", precisely because it formed and sustained a new idea with regard to slavery. The first wave of the revolution seemed to grasp the problem of slavery in its entirety. The leaders as well as the common people began to gain insight into the atrocities perpetuated by slavery. The just observation was made that the existence of slavery in America was a real opprobrium for the country and its status among the other countries of the world.

The Americans began to perceive the...
