

1. In Model 1, what does a dot represent?

One dot is one gas particle

2. Name two materials that the containers in Model 1 could be made from that would ensure that they were "nonflexible?"

The container could be made of some sort of glass or hard plastic

3. In Model 1, the length of the arrows represents the average kinetic energy of the molecules in that sample. Which gas variable ( $P$ ,  $V$ ,  $T$  or  $n$ ) is most closely related to the length of the arrows in Model 1? Temperature is most closely related to average kinetic energy.

4. Complete the following table for the two experiments in Model 1.

	Experiment A	Experiment B
Independent Variable	amount of gas	$T$
Dependent Variable	internal $P$	internal $P$
Controlled Variable(s)	$V, T, EP$	$V, \text{Amount of gas}, EP$

5. Of the variables that were controlled in both Experiment A and Experiment B in Model 1, one requires a nonflexible container. Name this variable, and explain why a nonflexible container is necessary. In your answer, consider the external and internal pressure data given in Model 1.

This variable is Volume and it must have a flexible container to change the pressure.
