is not their first language Commonly teachers only use the provided sources and materials designed by experts in English speaking countries It may become problematic considering that language and culture are closely related Studying the language also requires students to know the culture in which the language is used In this vein English reference books generally refer to the cultural context in the UK and America The books are usually designed by adopting the English as a Foreign Language Paradigm In that paradigm learning English culture is unavoidable Yet it may post some problems and challenges as the learners are not familiar with the context and what they study may be irrelevant Therefore there is a need to tackle this problem by adopting English as an International Language EIL paradigm In EIL local content or content which represents within the social and cultural context of the learner should be accommodated
