Through a blend of empirical observations and didactic prose, Liautard presents a comprehensive examination of the physiological and psychological implications of castration, aiming to educate practitioners on its ethical dimensions and practical applications. The book's meticulously structured chapters traverse historical perspectives, scientific insights, and case studies, all while employing a rigorous yet accessible literary style that balances technical jargon with clarity for the reader. Liautard, a 19th-century French veterinarian and an ardent advocate for agricultural science, drew upon his extensive experience in veterinary medicine to pen this seminal work. His commitment to advancing animal welfare and improving veterinary practices is evident throughout the text, reaffirming his role as a pioneer in the field. Liautard's background, rich in both traditional veterinary training and progressive scientific thought, provides a critical lens through which he explores the ethical considerations surrounding animal domestication and reproduction. *Animal Castration* is an essential read for veterinary students, animal husbandry professionals, and ethics scholars. Liautard's work not only equips readers with fundamental knowledge but also encourages deeper reflection on the implications of animal management practices. An
