

QUESTION: Finding all Perimeters with a radius of 10

Geometry with compass experience

Structure: 100% by

Please use the following information to solve the problem, as presented in the image:

Problem:

1. A circle with a radius of 10 units is centered at the origin (0,0) of a Cartesian coordinate system. Find the area of the region inside the circle but outside the square with vertices at (0,0), (10,0), (10,10), and (0,10).

Answer:

100π - 100

A circle with a radius of 10 units is centered at the origin (0,0) of a Cartesian coordinate system.

The square has vertices at (0,0), (10,0), (10,10), and (0,10).

Find the area of the region inside the circle but outside the square.

The area of the region inside the circle but outside the square is 100π - 100.

100π - 100

Answer's Solution:

1. The area of the region inside the circle but outside the square is 100π - 100. This is because the area of the circle is 100π (πr² = π(10)² = 100π) and the area of the square is 100 (side length = 10, area = side² = 10² = 100). The region inside the circle but outside the square is the difference between these two areas.

Answer:

100π - 100

The area of the region inside the circle but outside the square is 100π - 100.

100π - 100

$$100\pi - 100 = 100\pi - 100$$
