

14.3 Studying the Human Genome

Learning Objectives

LO 14.3.1 Explain how DNA sequencing led to the development of recombinant DNA technology, which is the process of joining DNA from different sources to create new genetic combinations.

- Explain how recombinant DNA technology is used to create transgenic organisms, which are organisms that contain DNA from another species.
- Explain how recombinant DNA technology is used to create transgenic organisms, which are organisms that contain DNA from another species.
- Explain how recombinant DNA technology is used to create transgenic organisms, which are organisms that contain DNA from another species.

LO 14.3.2 Explain how the Human Genome Project led to the development of personalized medicine, which is the use of a person's genetic information to guide medical decisions.

- Explain how the Human Genome Project led to the development of personalized medicine, which is the use of a person's genetic information to guide medical decisions.
- Explain how the Human Genome Project led to the development of personalized medicine, which is the use of a person's genetic information to guide medical decisions.

Ssg- Human Biology 6E Student Study Guide Chiras, 2008-02 Human Biology Sixth Edition provides students with a clear and concise introduction to the general
 concepts of mammalian biology and human structure and function With its unique focus on health and homeostasis Human
 Biology enhances students understanding of their own health needs and presents the scientific background necessary for
 students to think critically about biological information they encounter in the media The completely revised content and
 exceptional new art and photos provide students with a more user friendly text while excellent learning tools maximize
 comprehension of material
