FFS Quick Reference Guide ,1991 **General Technical Report PNW-GTR** ,2006 *Fire Management Notes* ,1986 *Job Seekers Guide* ,1972 **Willing's Press Guide and Advertisers' Directory and Handbook** ,1997

Willing's Press Guide ,1993 A guide to the press of the United Kingdom and to the principal publications of Europe Australia the Far East Gulf States and the U S A **Flood and Coastal Erosion Risk Management** Edmund Penning-Rowsell,Sally Priest,Dennis Parker,Joe Morris,Sylvia Tunstall,Christophe Viavattene,John Chatterton,Damon Owen,2014-01-03 A new Multi Coloured Manual This book is a successor to and replacement for the highly respected manual and handbook on the benefits of flood and coastal risk management produced by the Flood Hazard Research Centre at Middlesex University UK with support from Defra and the Environment Agency It builds upon a previous book known as the multi coloured manual 2005 which itself was a synthesis of the blue 1977 red 1987 and yellow manuals 1992 As such it expands and updates this work to provide a manual of assessment techniques of flood risk management benefits indirect benefits and coastal erosion risk management benefits It has three key aims First it provides methods and data which can be used for the practical assessment of schemes and policies Secondly it describes new research to update the data and improve techniques Thirdly it explains the limitations and complications of Benefit Cost Analysis to guide decision making on investment in river and coastal risk management schemes **Sierra Nevada Forest Plan Amendment** ,2000

Northwest Forest Plan, the First 10 Years (1994-2003) ,2006 This case study examines the socioeconomic changes that took place between 1990 and 2000 in and around lands managed by the Bureau of Land Management BLM Coos Bay District in southwestern Oregon for purposes of assessing the effects of the Northwest Forest Plan the Plan on rural economies and communities in the Coos Bay region The case study included an analysis of changes in the districts programs as well as socioeconomic changes that occurred within the communities of Coos Bay Myrtle Point and Reedsport Data were gathered during 2003 and 2004 from multiple sources including U S census databases county and state criminal justice and economic development databases and BLM annual reports Interviews with BLM employees and community residents provided additional insights on how the Plan affected local socioeconomic conditions and the districts interactions with local communities **General Technical Report RMRS** ,1998 **CVal** Edward M. Bilek,2009 This documentation is meant to accompany CVal a downloadable spreadsheet tool CVal was constructed for foresters other land management advisors landowners and carbon credit aggregators to evaluate the direct benefits and costs of entering into contracts for carbon sequestered in managed forests and forest plantations CVal was designed to evaluate Exchange Forestry Offset XFO contracts on the Chicago Climate Exchange CCX although the methodology could be adapted for other trading mechanisms and agricultural sequestration projects Both the documentation and the spreadsheet tool are downloadable from http://www.fpl.fs.fed.us/documnts/fplgtr/fpl_gtr180/fpl_gtr180.html Versions of CVal are available both with and without macros

Although all calculations can be done in the version without macros the macros version has buttons and automations that make the calculations convenient Our general finding is that it is critical in managed forest projects to determine whether carbon accumulated prior to entering the contract can be counted Depending on the contract year and length this can triple the revenue from CCX contracts If it is not possible to count pre contract year carbon then it may not be economically worthwhile to enter the program unless it is extended Other critical variables having a large effect on the overall profitability include the trade price of sequestered carbon the carbon sequestration rate and the hurdle rate the minimum required rate of return on investment used Up front and annual costs are important but overall profitability is not quite as sensitive to these costs as it is to the previously mentioned variables Users are expected to enter their own data to evaluate the feasibility of specific projects

E. Gregory McPherson, 1999 A Management-oriented Classification of Pinyon-Juniper Woodlands of the Great Basin Neil E. West, Robin J. Tausch, Paul T. Tueller, 1998 A hierarchical framework for the classification of Great Basin pinyon juniper woodlands was based on a systematic sample of 426 stands from a random selection of 66 of the 110 mountain ranges in the region That is mountain ranges were randomly selected but stands were systematically located on mountain ranges The National Hierarchical Framework of Ecological Units ECOMAP was used for the highest levels of classification subdividing the Great Basin into nine relatively environmentally homogeneous Sections The remaining levels are vegetation based focusing on the relative composition and dominance of pinyon and juniper and the dominant shrub and perennial grass species present This approach will allow managers to better relate the results of previous as well as new studies and management experiences
