Guide For Drafting Piping And Instrumentation Diagrams:

Guide for Drafting P&IDs Sybrina Durant,2015-12-29 P ID drafters are individuals who must care about every line annotation and symbol on each piping and instrumentation or process drawing they produce They should understand the need to learn to recognize when something does not look correct and to bring it to the attention of the proper source who can address the issue A P ID drafter is someone who is on their way to becoming a designer as a high level P ID specialist a piping designer or an instrument designer through on the job training This on the job training consists of constant research and interaction with process engineers piping designers and instrument designers throughout the progress of each drawing P ID drafters must ask questions when anything is not absolutely clear or when something just doesn't look right As P ID drafters who have worked at more than one company already know many items on process diagrams are depicted quite differently from one place to another As designers and engineers move around from firm to firm they all come into each new environment with their own ideas of how particular symbols should be drawn There can be so many different variations that it can make it seem there are no set standards available for drafting P IDs and other process drawings But there are This book will lay out many of them
