Education and the Commercial Mindset Samuel E. Abrams, 2016-04-25 America s commitment to public schooling once seemed unshakable But

today the movement to privatize K 12 education is stronger than ever Samuel E Abrams examines the rise of market forces in public education and reveals how a commercial mindset has taken over An outstanding book Carol Burris Washington Post Given the near complete absence of public information and debate about the stealth effort to privatize public schools this is the right time for the appearance of this book Samuel E Abrams a veteran teacher and administrator has written an elegant analysis of the workings of market forces in education Diane Ravitch New York Review of Books Education and the Commercial Mindset provides the most detailed and comprehensive analysis of the school privatization movement to date Students of American education will learn a great deal from it Leo Casey Dissent *Hod Mice and the Mouse Set Conjecture* Grigor Sargsyan, 2015-06-26 The author develops the theory of Hod mice below ADR is regular He uses this theory to show that HOD of the minimal model of ADR is regular satisfies GCH Moreover he shows that the Mouse Set Conjecture is true in the minimal model of ADR is regular Numerical Approximations of Stochastic Differential Equations with Non-Globally Lipschitz Continuous Coefficients Martin Hutzenthaler, Arnulf Jentzen, 2015-06-26 Many stochastic differential equations SDEs in the literature have a superlinearly growing nonlinearity in their drift or diffusion coefficient Unfortunately moments of the computationally efficient Euler Maruyama approximation method diverge for these SDEs in finite time This article develops a general theory based on rare events for studying integrability properties such as moment bounds for discrete time stochastic processes Using this approach the authors establish moment bounds for fully and partially drift implicit Euler methods and for a class of new explicit approximation methods which require only a few more arithmetical operations than the Euler Maruyama method These moment bounds are then used to prove strong convergence of the proposed schemes Finally the authors illustrate their results for several SDEs from finance physics biology and chemistry *Practical Handbook of Multi-Tiered Systems of Support* Rachel Brown-Chidsey, Rebekah Bickford, 2015-12-14 Accessible and comprehensive this book shows how to build a schoolwide multi tiered system of support MTSS from the ground up The MTSS framework encompasses tiered systems such as response to intervention RTI and positive behavioral interventions and supports PBIS and is designed to help all K 12 students succeed Every component of an MTSS is discussed effective instruction the role of school teams implementation in action assessment problem solving and data based decision making Practitioner friendly features include reflections from experienced implementers and an extended case study Reproducible checklists and forms can be downloaded and printed in a convenient 8 1/2 x 11 size **On the Differential Structure of Metric Measure Spaces and Applications** Nicola Gigli, 2015-06-26 The main goals of this paper are i To develop an abstract differential calculus on metric measure spaces by investigating the duality relations between differentials and gradients of Sobolev functions This will be achieved without calling into play any sort of analysis in charts our assumptions being the metric space is complete and separable and the measure is Radon and non negative ii To employ these notions of calculus to provide via integration by parts a general definition of distributional Laplacian thus giving a meaning to

an expression like where ρ is a function and μ is a measure iii To show that on spaces with Ricci curvature bounded from below and dimension bounded from above the Laplacian of the distance function is always a measure and that this measure has the standard sharp comparison properties This result requires an additional assumption on the space which reduces to strict convexity of the norm in the case of smooth Finsler structures and is always satisfied on spaces with linear Laplacian a situation which is analyzed in detail
