Identity in Dialogue Didier Pollefeyt, Jan Bouwens, 2014. Situated in increasingly pluralizing cultural contexts, Catholic schools face the challenge of recontextualizing their identity in a culturally plausible and theologically legitimate way. To this end, across Victoria, Australia, the Enhancing Catholic School Identity Project (ECSIP) has developed a suite of empirical instruments that provide an in-depth analysis of a school's current as well as desired identity in a statistically reliable way. The results are discussed in this book. After describing and interpreting the results, the empirical insights lead to well-informed recommendations aimed at the identity development of Catholic schools with a normative preference for the Recontextualizing Dialogue School model as the way to enhance Catholic identity in a context of diversity. In this manner, ECSIP supports ongoing processes of self-assessment that form the basis for continuing dynamics of self-improvement of the identity of Catholic educational institutions. Series: Christian Religious Education and School Identity, Vol. 1. Subject: Religious Studies, Christianity, Catholicism, Education, Australian Studies.
