MICROSOFT SQL TRAINING

Microsoft SQL is the most widely used database for small to medium enterprises. Its ease of installation and administration, flexible language, and integration with Microsoft Servers is why it has become so popular and the go-to standard for databases. It contains both a graphical element for installation and administration, as well as an extensive language element.

We offer two Microsoft SQL training courses dependent on your organisation's needs:

INTRODUCTION TO MICROSOFT MYSQL

ADVANCED MICROSOFT MYSQL

Our Introductory course covers the following topics: the installation of SQL Server, the creation of databases, tables, fields, joining and creating data views, all within the graphical environment.

The Advanced course is a follow up of the Introductory course that covers topics such as; an introduction to the SQL language, using SELECT, INSERT, UPDATE and DELETE statements. It also includes the "UpSert" concept.
