opponents tells to see through their bluffs Hertenstein shows that we can likewise train ourselves to read physical cues to significantly increase our predictive acumen By looking for certain clues we can accurately call everything from election results to the likelihood of marital success IQ scores to sexual orientation even from flimsy evidence such as an old yearbook photo or a silent one minute video Moreover by understanding how people read our body language we can adjust our own behavior so as to ace our next job interview or tip the dating scales in our favor Drawing on rigorous research in psychology and brain science Hertenstein shows us how to hone our powers of observation to increase our predictive capacities A charming testament to the power of the human mind The Tell will to paraphrase Sherlock Holmes show us how to notice what we see *The New Cognitive Neurosciences* Michael S.
