About the author: I am a professor of computational science and an experienced academic with around 100 published papers. My research is interdisciplinary: to say the least, I have studied the social fabric of smartphone users, the genetic structure of ant supercolonies, the connectome of the human brain, networks of public transport, and the molecular biology of the human immune system, to name a few. So one could say that I have a broad range of scientific interests, or that I simply cannot choose. But that's exactly the way I like it.
