Portraying Authorship Anita Savo, 2024-05-01

Portraying Authorship argues that the medieval Castilian writer Juan Manuel fashioned a seemingly modern authorial persona from the accumulation and synthesis of medieval authorial roles In the manuscript culture of medieval Castile and across Latin Europe writers typically referred to their work in ways that corresponded to their role in the bookmaking process scribes took credit for preserving the works of others compilers for combining disparate texts in productive ways commentators for explaining obscure works and authors for writing their own words Combining literary analysis with book history Anita Savo reveals how Juan Manuel forged his authorial persona Don Juan by adopting all four medieval writerly

roles thereby reaping the ethical benefits of each one Each chapter in Portraying Authorship highlights a different authorial role to show how Don Juan and others who wrote in his name assumed responsibility for that role and adapted its rhetoric to his vernacular literary project The book concludes that Don Juan s authorial self portrait not only gave the humanist writers of the fifteenth century a model to imitate but also persuaded subsequent scribes editors and translators to portray him as an individual author In doing so Portraying Authorship illuminates how Juan Manuel s concept of authorship helped to secure him a privileged position in narratives of Spanish literary history The Dissertation-to-Book Workbook Katelyn E.
