Drinkard,Gerald L. Mattingly,James Maxwell Miller,1988 Criminal Circumstance Kenneth Land,2018-02-06 The main objective of this book is to propose an alternative criminal opportunity theory The authors build upon social control and routine activities to develop a dynamic multi contextual criminal opportunity theory Emphasizing the importance of contextual explanations of criminal acts they propose two levels of analysis individual and environmental At each level the theory pivots on three broad organizing constructs offenders motivated to commit criminal acts targets such as

persons or property suitable as objects of criminal acts and the presence or absence of individuals or other defensive mechanisms capable of serving as guardians against criminal acts Crime is profoundly real possessing qualities that make its occurrence and prevention pressing and persistent matters for individuals and societies Theory in contrast is seen as highly abstract and removed from the seriousness of real life Theory almost seems to be a peculiar sport of an academic class The practically minded even some academic criminologists are often perplexed by the seeming obsession some scholars have with theory which after all is nothing more than an explanation of facts The practically minded seeing a compelling need to identify the crucial factors that could be used to predict and prevent crime wonder why anyone would invest precious time and energy into speculating about the abstract underlying details of why crime occurs when and where it does The authors contend that every intervention prevention and policy is based on some theoretical explanation of the causes of human behavior The improvement of interventions preventions and policies is thus directly related to the improvement of theoretical understandings of the abstract underlying details of the causes of crime The development of explanations of events when properly done is a crucial component to understanding and possibly improving the real world This work does just that

Performance Analysis for Public and Nonprofit Organizations XiaoHu Wang,2010 The book focuses on application of performance analysis tools not the theory of performance management This text is an effective learning tool for students in analytical technique courses in public administration and policy programs With other texts students may learn about a statistical concept and calculation but still don t understand the managerial context where the statistical tool applies Consequently they often fail to understand the managerial importance of statistical tools they learn and worse fail to recognize the correct tool to use when a managerial issue rises This book corrects this problem by providing a managerial context that bridges statistical concepts and the managerial reality The managerial context is performance management in which performance data are presented monitored and analyzed It is in this performance management context that the usefulness and applicability of statistical tools are illuminated for the learner BOOK JACKET How Was Life?
