La Banque Sous L'occupation Paradoxes De L'histoire D'une Profession:

France: The Dark Years, 1940-1944 Julian Jackson, 2003-03-05 The French call them the Dark Years This definitive new history of Occupied France explores the myths and realities of four of the most divisive years in French history Taking in ordinary people's experiences of defeat collaboration resistance and liberation it uncovers the conflicting memories of occupation which ensure that even today France continues to debate the legacy of the Vichy years *The Oxford Handbook of Banking and Financial History* Youssef Cassis, Richard S. Grossman, Catherine R. Schenk, 2016-06-23 The financial crisis of 2008 aroused widespread interest in banking and financial history among policy makers academics journalists and even bankers in addition to the wider public References in the press to the term Great Depression spiked after the failure of Lehman Brothers in November 2008 with similar surges in references to economic history at various times during the financial turbulence In an attempt to better understand the magnitude of the shock there was a demand for historical parallels How severe was the financial crash Was it in fact the most severe financial crisis since the Great Depression Were its causes unique or part of a well known historical pattern And have financial crises always led to severe depressions Historical reflection on the recent financial crises and the long term development of the financial system go hand in hand This volume provides the material for such a reflection by presenting the state of the art in banking and financial history Nineteen highly regarded experts present chapters on the economic and financial side of banking and financial activities primarily though not solely in advanced economies in a long term comparative perspective In addition to paying attention to general issues not least those related to theoretical and methodological aspects of the discipline the volume approaches the banking and financial world from four distinct but interrelated angles financial institutions financial markets financial regulation and financial crises **Hitler's Collaborators** Philip Morgan, 2018 The controversial and still sensitive story of the Nazi collaborators of occupied Europe what they did why they did it and the consequences of their actions for millions of their fellow citizens *The Rise and Fall of State-Owned Enterprise in the Western World* Pierangelo Maria Toninelli, 2000-10-02 This book examines the twentieth century rise and fall of state owned enterprises in Western political economy **The Politics of Industrial Collaboration during World War II** Martin Horn, Talbot Imlay, 2014-04-17 Did Ford SAF sabotage the German war effort by deliberately manufacturing fewer vehicles than they could have Ford SAF claimed after the war that they did Exploring the nature and limits of industrial collaboration in occupied France Horn and Imlay trace the wartime activities of Ford Motor Company's French affiliate The company began making trucks and engine parts for the French military but from 1940 until Liberation in 1944 was supplying the Wehrmacht This book offers a fascinating account of how the company negotiated the conflicting demands of the French German and American authorities to thrive during the war It sheds important new light on broader issues such as the wartime relationship between private enterprise and state authority Nazi Germany's economic policies and the nature of the German occupation of France

collaboration and resistance in Vichy France and the role of American companies in Occupied Europe **From Tellers to Sellers** Marino Regini, Jim Kitay, Martin Baethge, 1999 The country chapters present detailed analyses of the findings and the conclusion assesses the role of markets technology and institutions in employment relations and discusses the interpretive frameworks that help make sense of their change and variation across countries BOOK JACKET Enterprise in the Period of Fascism in Europe Harold James, Jakob Tanner, 2017-07-05 The essays in this volume consider the involvement of business corporations and of individual businessmen in the politics of the 1930s and 1940s in the move away from the market and also from democracy towards state control and authoritarianism including the massive intervention of the state in property rights How far did businesses attempt to guide this intervention for their own purposes and to what extent did they succeed This debate deals centrally with the role of German business of banks of industrial corporations and of small tradesmen in the Nazi regime An older discussion of how they may have facilitated the Nazi takeover has been supplemented here by an investigation into how they made the regime's policies possible and the extent to which the profit motive drove them to participate with sometimes more sometimes less enthusiasm in the politics of inhumanity Such discussion has been given further impetus by legal action initially in the United States in the form of class action suits on behalf of the victims of Nazism What do such legal and political debates mean for business history What are the current responsibilities of business facing the consequences of historical action And what lessons should be learned concerning the ethics of business behaviour The contributions to this volume were originally presented as papers at a conference organised by the Society for European Business History in Paris in November 1998 *History of Financial Institutions* Carmen Hofmann, Martin L. Müller, 2016-10-04 Globalization is not an external force but a result of concrete business decisions made by millions of entrepreneurs and managers across the world As such the modern corporation has completely altered the economic landscape business and finance have shaped the international order of the modern world History of Financial Institutions contributes to the analysis of how the modern corporation business and finance have shaped and keep on shaping our world In a collection of nine succinct essays this volume looks at the role of finance in European history from the beginning of the 19th century to the period after the Second World War Archivists and financial historians who are also leading scholars of banking and financial history investigate the ways in which the international post war order developed They draw on often hitherto unused archival sources from central banks and other institutions to reveal the unique histories of a variety of European countries and the paths that have led to the contemporary economic and financial system The collection includes reflections on monetary stabilization inflation hyperinflation globalization and public relations in banking and commerce This book is essential reading for banking and finance executives as well as policy makers with a historical interest It will also be of importance to academics with a particular interest in economic history financial or banking history and European history *National Capitalisms, Global Competition, and Economic Performance* Sigrid Quack, Glenn Morgan, Richard Whitley, 2000

Why are some firms successful on global markets whilst others are not In this collection of papers a group of distinguished international researchers examine the inter relationship between national context firm performance and global competitiveness In a series of empirical studies covering major industries such as banking telecommunications construction automobiles and airlines in a number of European countries Great Britain France Germany Holland Finland Slovenia the studies show how distinctive patterns of firm competences and capabilities arise from national contexts These influence the way in which firms perform in response to changing technologies and competitive pressures Thus the impact of the globalisation of economic activity may be to reinforce existing national differences in firm performance rather than producing a homogenisation and standardisation This book will be of interest to researchers in business and management sociology economics and political science for its comparative organizational approach to problems of economic performance
