

Teaching Essay Sample: Thematic Unit Lesson Plan Essay

As teachers, mostly the first grade student teachers, they do a lot when it comes to language, writing, speaking, reading and even identification of different letters and sounds. These teachers play a major role in the students lives by helping them achieve certain goals and being able to speak and write fluently with no difficulty. After the teachers impute, she must assess the students so as to be aware if the student understood anything from the teaching. This is achieved through the usage of the following assessment tests:

Reading comprehension

This is the most common type of assessment used in determining the fluency, accuracy, speed and confidence of the student. In this case, a student is given a comprehension passage to read it loudly for faster and much more convenient way of understanding the passage. After that, the teacher asks the student random questions from the passage so as to test the level of the students understanding and mastery of content. In this case, the student is given a passage which is worth their age and grade so as to avoid subjecting them into harder vocabulary and for easier understanding of the student. This kind of assessment helps the teacher to record the different types of reading behaviors and the errors made. This helps them in knowing where the problem is and work on it before it is too late for corrections.

Portfolios.

Portfolios are used to document students achievements and even failures so as to monitor them at a close range without losing track. This kind of assessment gives you all the students details, both positive and negative. It also gives the student time to internalize on their strengths and weaknesses and try to find solutions on how to work on their weaknesses to make it right. However, while building a portfolio, it is very important to note that a portfolio is not a simple file of all completed work but rather a great way to show students development and their achievements in their endeavours. While using a portfolio, it will help in the knowing more about the student and also analyzing on their academic status. While developing the portfolios, students are engaged in that process and are responsible for helping to select the assignments that are showcased. This process is very essential as it helps students to set future reading and writing strategies. To add on it, it builds self-esteem, academic independence and self-image.

In the assessment part, this process is fun, student friendly, exciting and easiest way of assessing students. Its benefits is that it minimizes stress and test anxiety since assignment and materials used have been chosen by the students themselves and their peers. Hence making work even more easier for both parties.

This kind of assessment can help in guiding you on how to instruct the student. This is possible by looking at the childs work a teacher can quickly see what lessons are further needed.

Types of portfolios.
