<b>Subject Area (s)</b>	<b>Mathematics</b>
<b>Grade Level</b>	<b>7<sup>th</sup></b>

<b>Varying Objectives for Individuals Needs</b>	How will I vary these objectives for students who do not understand the material? Students who are new to rational numbers, at the beginning of the lesson I will explain to the students what rational numbers are and how they can be translated into different types of rational numbers. How will I vary these objectives for students who have already mastered the concept? These students will be given extra practice comparing larger numbers as the rest of the class catches up to them. How will I vary these objectives for students who are presently learning English? These students will be given the same notes and will work with their mentors to get the best understanding they can get. Also they can see me after school for more assistance.
<b>Statement of Purpose</b>	<i>Why is it important for the students to learn this content?</i> This lesson will open the door for students as they will need to know how to compare percentages, taxes, tips, and know how to translate rational numbers, knowing that just because a number is written one way doesn't mean it cannot be written another way.
