

Electro/electronic PLC crane control with test system

- Control of the rotation, steering gear and the lifting and lowering motions by the LCU PLC computer system
- PLC control
- Four working motions can be performed independently from one another
- Speeds for lifting/lowering, lifting and lowering procedures by 5 steps
- Step drill response rate of the activation of crane motions
- Test gear and steering gear are operating within a "load at zero". This enables very sensitive lifting/lowering of loads, in lowering, maximum safety loading of the load. The generated electrical energy is not converted into heat but can be re-employed for a 2nd motion. This saves fuel and the oil is less thermally expanded than by operation within the rated speed
- Functional test of all essential components by means of the LCU PLC test system
