**Interconnected Worlds** Henry Wai-Chung Yeung,2022-06-28 The

global electronics industry is one of the most innovation driven and technology intensive sectors in the contemporary world economy. From semiconductors to end products, complex transnational production and value generating activities have integrated diverse macro regions and national economies worldwide into the interconnected worlds of global electronics. This book argues that the current era of interconnected worlds started in the early 1990s when electronics production moved from systems dominated by lead firms in the United States, Western Europe and Japan towards increasingly globalized and cross macro regional electronics manufacturing centered in East Asia. By the 2010s, this co evolution of production network complexity transformed global electronics through which lead firms from South Korea, Taiwan and China integrated East Asia into the interconnected worlds of electronics production across the globe. Drawing on literature on the electronics industry, new empirical material comprising custom datasets and extensive personal interviews, this book examines through a network approach the co evolution of globalized electronics production centered in East Asia across different national economies and sub national regions. With comprehensive analysis up to 2021, Yeung analyzes the geographical configurations where organizational strategies, how and causal drivers, why of global production networks, setting a definitive benchmark into the dynamic transformations in global electronics and other globalized industries. The book will serve as a crucial resource for academic and policy research, offering a conceptual empirically driven grounding in the theory of these networks that has become highly influential across the social sciences.

*Smittestopp – A Case Study on Digital Contact Tracing* Ahmed Elmokashfi, Olav Lysne, Valeriya Naumova, 2022-07-19. This open access book describes Smittestopp, the first Norwegian system for digital contact tracing of Covid 19 infections, which was developed in March and early April 2020. The system was deployed after five weeks of development and was active for a little more than two months when a drop in infection levels in Norway and privacy concerns led to shutting it down. The intention of this book is twofold. First, it reports on the design choices made in the development phase. Second, as one of the only systems in the world that collected population data into a central database and which was used for an entire population, we can share experience on how the design choices impacted the system's operation. By sharing lessons learned and the challenges faced during the development and deployment of the technology, we hope that this book can be a valuable guide for experts from different domains such as big data collection and analysis, application development and deployment in a national population as well as digital tracing.

**Manual de Criptoativos** André Castro Carvalho, Andressa Guimarães Torquato Fernandes, 2023-05-01. O livro se propõe a atender um público cada vez mais exigente que busca conhecimento profundo sobre o fenômeno dos criptoativos de maneira prática e que possa servir de apoio para o profissional que trabalha com esse ecossistema ou que deseja ingressar nessa realidade cada vez mais presente na vida dos brasileiros. A obra contou com a colaboração das maiores referências nacionais sobre o assunto, autores reconhecidos por sua excelência acadêmica e profissional que de maneira direta ou indireta trabalham com o universo dos criptoativos, o que traz uma visão bastante pragmática. Os temas abordados foram cuidadosamente pensados para que o

leitor tenha uma visão completa e ao mesmo tempo direta sobre a relação dos criptoativos com múltiplos campos do direito como tributação, regulação financeira, propriedade intelectual, prevenção de lavagem de dinheiro e uso de criptoativos pelo setor público e as chamadas moedas digitais dos bancos centrais CBDCs. Além disso, aborda a regulação jurídica do metaverso, bem como aspectos essenciais sobre tecnologia da informação.
