Paragraph

I plan on a career in mechanical engineering for many reasons. One reason is that you can make a lot of money as engineering from a starting salary of \$33,000 to \$94,000. Furthermore, it is something I am passionate about as I enjoy building, creating, and working on projects. I need good self-regulation skills and I need to be persistence to become an engineer. I also need good collaboration skills to work with others. For education I need to get my high school diploma so I can pursue university. In university I need to get my bachelor's and master's degree. With this I can easily get an engineering job and work at it. Related careers to mechanical engineering are electrical engineering, material engineering, civil engineering, aerospace engineering, etc. In material engineering you create new materials that can help the world. An example of this is the invention of plastic. In aerospace engineering you work on projects that are related to advancements in space and airplanes.
