How "Natives" Think Marshall Sahlins, 1996-08-14

When Western scholars write about non Western societies do they inevitably perpetuate the myths of European imperialism Can they ever articulate the meanings and logics of non Western peoples Who has the right to speak for whom Questions such as these are among the most hotly debated in contemporary intellectual life In *How Natives Think* Marshall Sahlins addresses these issues head on while building a powerful case for the ability of anthropologists working in the Western tradition to understand other cultures In recent years these questions have arisen in debates over the death and deification of Captain James Cook on Hawai i Island in 1779 Did the Hawaiians truly receive Cook as a manifestation of their own god Lono Or were they too pragmatic too worldly wise to accept the foreigner as a god Moreover can a non native scholar give voice to a native point of view In his 1992 book *The Apotheosis of Captain Cook* Gananath Obeyesekere used this very issue to attack Sahlins s decades of scholarship on Hawaii Accusing Sahlins of elementary mistakes of fact and logic even of intentional distortion Obeyesekere portrayed Sahlins as accepting a naive ethnocentric idea of superiority of the white man over natives Hawaiian and otherwise Claiming that his own Sri Lankan heritage gave him privileged access to the Polynesian native perspective Obeyesekere contended that Hawaiians were actually pragmatists too rational and sensible to mistake Cook for a god Curiously then as Sahlins shows Obeyesekere turns eighteenth century Hawaiians into twentieth century modern Europeans living up to the highest Western standards of practical rationality By contrast Western scholars are turned into classic custom bound natives endlessly repeating their ancestral traditions of the White man s superiority by insisting Cook was taken for a god But this inverted ethnocentrism can only be supported as Sahlins demonstrates through wholesale fabrications of Hawaiian ethnography and history not to mention Obeyesekere s sustained misrepresentations of Sahlins s own work And in the end although he claims to be speaking on behalf of the natives Obeyesekere by substituting a home made rationality for Hawaiian culture systematically eliminates the voices of Hawaiian people from their own history *How Natives Think* goes far beyond specialized debates about the alleged superiority of Western traditions The culmination of Sahlins s ethnohistorical research on Hawaii it is a reaffirmation for understanding difference

Marshall Sahlins, 1995 On Captain Cook Revival: How Natives Think (1926) Lucien Lévy-Bruhl, 2018-12-20 Lévy Bruhl speculates about what he posited as the two basic mind sets of mankind primitive and Western The primitive mind does not differentiate the supernatural from reality but rather uses mystical participation to manipulate the world Moreover the primitive mind doesn't address contradictions The Western mind by contrast uses speculation and logic How Natives Think IS an accurate and valuable contribution to anthropology How Natives Think , 1966 **How Natives Think** Lucien Lévy-Bruhl, 2021-10-27 When Lévy Bruhl uses the word primitive this does not in any way reflect a devaluation or labeling as in any way inferiority On the contrary it is Lévy Bruhl who portrays the thinking of indigenous peoples as simply different from ours The work of Lévy Bruhl also had a strong influence on Lev S Vygotsky and the development of his concept of culture and history Authors who from today's perspective and in the face of current research were far ahead of their time were often misunderstood or simply ignored by their contemporaries And even if an excerpt from an extensive work is always subjective it still offers a middle ground between subsuming under a catchphrase on the one hand and intensive preoccupation with the author and his work on the other If you want to deal intensively with the work please refer to a reprint *How Natives Think, by Lucien Lévy-Bruhl* Lucien Lévy-Bruhl, 1966 *How Forests Think* Eduardo Kohn, 2013-08-03 Can forests think Do dogs dream In this astonishing book Eduardo Kohn challenges the very foundations of anthropology calling into question our central assumptions about what it means to be human and thus distinct from all other life forms Based on four years of fieldwork among the Runa of Ecuador's Upper Amazon Eduardo Kohn draws on his rich ethnography to explore how Amazonians interact with the many creatures that inhabit one of the world's most complex ecosystems Whether or not we recognize it our anthropological tools hinge on those capacities that make us distinctly human However when we turn our ethnographic attention to how we relate to other kinds of beings these tools which have the effect of divorcing us from the rest of the world break down *How Forests Think* seizes on this breakdown as an opportunity Avoiding reductionistic solutions and without losing sight of how our lives and those of others are caught up in the moral webs we humans spin this book skillfully fashions new kinds of conceptual tools from the strange and unexpected properties of the living world itself In this groundbreaking work Kohn takes anthropology in a new and exciting direction one that offers a more capacious way to think about the world we share with other kinds of beings **Primitive Thinking** Nicola Gess, 2022-09-06 This book examines the discourse on primitive thinking in early twentieth century Germany It explores texts from the social sciences writings on art and language and most centrally literary works by Robert Musil Walter Benjamin Gottfried Benn and Robert Müller focusing on three figurations of alterity prominent in European primitivism indigenous cultures children and the mentally ill How natives think, authorized tr Lucien Lévy-Bruhl, The Archaic Paul Bishop, 2011-09-30 *The Archaic* takes as its major reference points C G Jung's classic essay *Archaic Man* 1930 and Ernesto Grassi's paper on *Archaic Theories of History* 1990 Moving beyond the confines of a Jungian framework to include other

methodological approaches this book explores the concept of the archaic Defined as meaning old fashioned primitive antiquated the archaic is in fact much more than something very very old it is timeless inasmuch as it is before time itself Arch Urgrund Ungrund primordial darkness eternal nothing are names for something essentially nameless yet whose presence we nevertheless intuit This book focuses on the reception of myth in the tradition of German Idealism or Romanticism Creuzer Schelling Nietzsche which not only looked back to earlier thinkers such as Jacob Boehme but also laid down roots for developments in twentieth century thought Ludwig Klages Martin Heidegger The Archaic also includes studies of the Germanic dimension of the archaic Charles Bambach Alan Cardew a discussion of the mytho phenomenological approach to the archaic Robert Josef Kozljani a series of articles on Jung s understanding of the archaic Paul Bishop Susan Rowland Robert Segal This book will be of interest to psychoanalysts anthropologists and phenomenologists as well as students of psychology cultural studies religious studies and philosophy as it seeks to rehabilitate a concept of demonstrable and urgent relevance for our time

Liberals and Cannibals Steven Lukes, 2017-01-31 With debates on the meaning of liberal society more heated than ever this is a timely re issue of a classic text Can the tension between relativism and the moral universalism current in contemporary politics be resolved within the framework of liberalism How is liberal society to interpret the diversity of morals Is pluralism the appropriate response How does pluralism differ from the widely condemned ethnocentric relativism liberalism for the Liberals cannibalism for the cannibals Confronting liberal thought with its own limitations Steven Lukes work is more relevant than ever While recognizing the dangers of moral imperialism Lukes argues that a relativist position based on identifying clearly distinct cultural and moral communities is incoherent Drawing on work in anthropology and philosophy he examines the nature of social justice the politics of identity and human rights theory

How to Think Like an Anthropologist Matthew Engelke, 2019-06-18 What is anthropology What can it tell us about the world Why in short does it matter For well over a century cultural anthropologists have circled the globe from Papua New Guinea to suburban England and from China to California uncovering surprising facts and insights about how humans organize their lives and articulate their values In the process anthropology has done more than any other discipline to reveal what culture means and why it matters By weaving together examples and theories from around the world Matthew Engelke provides a lively accessible and at times irreverent introduction to anthropology covering a wide range of classic and contemporary approaches subjects and practitioners Presenting a set of memorable cases he encourages readers to think deeply about some of the key concepts with which anthropology tries to make sense of the world from culture and nature to authority and blood Along the way he shows why anthropology matters not only because it helps us understand other cultures and points of view but also because in the process it reveals something about ourselves and our own cultures too

Cover Before Nature Francesca Rochberg, 2020-08-07 In the modern West we take for granted that what we call the natural world confronts us all and always has but Before Nature explores that almost unimaginable time when there was no

such conception of nature no word reference or sense for it Before the concept of nature formed over the long history of European philosophy and science our ancestors in ancient Assyria and Babylonia developed an inquiry into the world in a way that is kindred to our modern science With *Before Nature* Francesca Rochberg explores that Assyro-Babylonian knowledge tradition and shows how it relates to the entire history of science From a modern Western perspective a world not conceived somehow within the framework of physical nature is difficult if not impossible to imagine Yet as Rochberg lays out ancient investigations of regularity and irregularity norms and anomalies clearly established an axis of knowledge between the knower and an intelligible ordered world Rochberg is the first scholar to make a case for how exactly we can understand cuneiform knowledge observation prediction and explanation in relation to science without recourse to later ideas of nature Systematically examining the whole of Mesopotamian science with a distinctive historical and methodological approach *Before Nature* will open up surprising new pathways for studying the history of science

The Participant Christopher M. Kelty, 2020-01-21 Participation is everywhere today It has been formalized measured standardized scaled up network enabled and sent around the world Platforms algorithms and software offer to make participation easier but new technologies have had the opposite effect We find ourselves suspicious of how participation extracts our data or monetizes our emotions and the more procedural participation becomes the more it seems to recede from our grasp In this book Christopher M. Kelty traces four stories of participation across the twentieth century showing how they are part of a much longer term problem in relation to the individual and collective experience of representative democracy Kelty argues that in the last century or so the power of participation has dwindled over time it has been formatted in ways that cramp and dwarf it even as the drive to participate has spread to nearly every kind of human endeavor all around the world *The Participant* is a historical ethnography of the concept of participation investigating how the concept has evolved into the form it takes today It is a book that asks Why do we participate And sometimes Why do we refuse

How French Moderns Think Frédéric Keck, 2024-04-17 This book traces the contributions of the Lévy-Bruhl family to social and political thought and expertise in 20th century France shaping the anticipation of economic and health crises *How French Moderns Think* tells the story of the French sociological tradition through four generations of the Lévy-Bruhl family Lucien who founded the Institute of Ethnology at the University of Paris his son Henri who founded the Institute of Roman Law his grandson Raymond who took part in the creation of the National Institute of Statistics and Economic Studies and his great grandson Daniel a vaccine specialist at the Institute of Public Health This family history casts a new light on the philosophical debates about primitive mentality and the savage mind By drawing on the expert knowledge inherent in this family genealogy the articulation between the logical and the pre-logical is not a cognitive question but rather a problem of anticipating unpredictable events By relating Lévy-Bruhl's engagements from the Dreyfus Affair to the Minister of Armaments during the First World War Keck narrates the confrontation of the socialist ideal of justice and truth with the French colonial experience and its transformations in global

technologies preparing for pandemics **How Natives Think** Lucien Levy-Bruhl, 2015-02-23 2015 Reprint of 1926 Edition
Full facsimile of the original edition Not reproduced with Optical Recognition Software In this work first published as *Les Fonctions Mentales dans les Societes Inferieures* Levy Bruhl speculated about what he posited as the two basic mindsets of mankind primitive and Western The primitive mind does not differentiate the supernatural from reality but rather uses mystical participation to manipulate the world According to Levy Bruhl moreover the primitive mind doesn t address contradictions The Western mind by contrast uses speculation and logic Like many theorists of his time Levy Bruhl believed in a historical and evolutionary teleology leading from the primitive mind to the Western mind Sociologist Stanislav Andreski argued that despite its flaws Levy Bruhl s *How Natives Think* was an accurate and valuable contribution to anthropology perhaps even more so than better known work by Claude Levi Strauss Intellectual Developments in Greece and China Raymond W.K. Lau, 2020-03-17 This book presents a study of historical sociology and a comparison of ancient Greece s and ancient China s intellectual developments It provides a special historical sociological theoretical model allowing the exploration of how and why Greece s and China s developments followed two different trajectories This model allows a superior explanation of this phenomenon than previous studies which all employ the outdated methodology of mono causal determinism This work takes the critique of Eurocentric views in comparative studies pioneered by Joseph Needham in *Science and Civilization in China* to a new level of excellence because in addition to presenting new empirical findings and dispelling previous misunderstandings it also provides a sophisticated theoretical analysis It will appeal to scholars and students in the fields of comparative intellectual studies sinology historical sociology classics and intellectual history
