Skyhorse Publishing, as well as our Sports Publishing imprint, are proud to publish a broad range of books for readers interested in sports: books about baseball, pro football, college football, pro and college basketball, hockey, or soccer. We have a book about your sport or your team. Whether you are a New York Yankees fan or hail from Red Sox nation, whether you are a die-hard Green Bay Packers or Dallas Cowboys fan, whether you root for the Kentucky Wildcats, Louisville Cardinals, UCLA Bruins, or Kansas Jayhawks, whether you root for the Boston Bruins, Toronto Maple Leafs, Montreal Canadiens, or Los Angeles Kings, we have a book for you. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home.

**Mind Games** Jeff Grout, Sarah Perrin, 2004-10-15

What makes a winner in business or in sport? Why do some people consistently break sales targets, cross the line first, or hammer the ball in the net with pinpoint accuracy? Natural talent and disciplined training are vital. But with two equally matched professionals, something else makes the difference that provides that extra champion factor: the mind. *Mind Games* looks into the mental processes of sporting stars, identifying the attitudes and approaches that enable them to achieve peak performance every time and applies them specifically to the world of business. What are the key mental characteristics that make some people come out on top? How do winners channel adrenaline into controlled power while losers choke? What do sportsmen and women mean when they talk about the inner game, being in the zone, or being in the now? What is it that coaches do to realise the potential they see? What are the lessons that business winners need to learn from sport's superstars? *Mind Games* has the full involvement of over 30 sporting household names, including Sven Goran Eriksson, Matthew Pinsent, Clive Woodward, Nick Faldo, Jonny Wilkinson. The authors draw on extensive first-hand experiences of acknowledged sporting champions across a range of sports, identifying personal techniques proven to have worked under the pressure of top-level competition. They also draw on the expertise of professional coaches and psychologists who have worked with sportsmen and women.

*This Game's the Best! So Why Don't They Quit Screwing With It?* George Karl, Don Yaeger, 2014-10-07. Look back at the early coaching career of Hall of Famer George Karl, former head coach of the Seattle SuperSonics and one of the most outspoken men in professional basketball. Opinionated and always passionate about the sport, Karl cuts loose with controversial views on the NBA, the players, the media, sports agents, and the many other elements that make the game great and sometimes screw it up. In *This Game's the Best So Why Don't They Quit Screwing With It*...

**How to Navigate Life**

Belle Liang, PhD, Timothy Klein, LCSW, 2022-08-02. An essential guide to tackling what students, families, and educators can do now to cut through stress and performance pressure and find a path to purpose. Today's college-bound kids are stressed, anxious, and navigating demands in their lives unimaginable to a previous generation. They're performance machines hitting the benchmarks they're supposed to in order to reach the next tier of a relentless ladder. Then their mental and physical

exhaustion carries over right into first jobs What have traditionally been considered the best years of life have become the beaten down years of life Belle Liang and Timothy Klein devote their careers both to counseling individual students and to cutting through the daily pressures to show a better way a framework and set of questions to find kids true north what really turns them on in life and how to harness the core qualities that reveal allowing them to choose a course of study a college and a career Even the gentlest parents and teachers tend to play into pervasive societal pressure for students to PERFORM And when we take the foot off the gas we beg the kids to just figure out what their PASSION is Neither is a recipe for mental or physical health or ironically for performance or passion How to Navigate Life shows that successful human beings instead tap into their PURPOSE the why behind the what and how Best of all purpose is a completely translatable quality to every aspect of life from first jobs to last jobs and everything in between

**International Perspectives on Gender and Mathematics Education** Olof Steinthorsdottir, Helen J. Forgasz, Joanne Rossi Becker, Kyeonghwa Lee, 2010-06-01 Why a book on gender issues in mathematics in the 21st century Several factors have influenced the undertaking of this project by the editors First an international volume focusing on gender and mathematics has not appeared since publication of papers emerging from the 1996 International Congress on Mathematical Education Keitel 1998 Surely it was time for an updated look at this critical area of mathematics education Second we have had lively discussion and working groups on gender issues at conferences of the International Group for the Psychology of Mathematics Education PME for the past four years sessions at which stimulating and ground breaking research has been discussed by participants from many different countries Some publication seemed essential to share this new knowledge emerging from a wider variety of countries and from different cultural perspectives Third some western countries such as Australia and the USA have experienced in recent years a focus on the boy problem with an underlying assumption that issues of females and mathematics have been solved and are no longer worthy of interest Thus it seemed timely to look more closely at the issue of gender and mathematics internationally When the idea for this volume first emerged invitations were issued to those regularly attending the working and discussion groups at PME Potential authors were charged to focus on gender issues in mathematics and were given wide scope to hone in on the issues that were central to their own research efforts or were in receipt or in need of close attention in their own national or regional contexts
