

HOW TO WRITE A RESEARCH PAPER

What is a Research Paper?

A research paper is a piece of academic writing, consisting of analysis, interpretation, and argument-based research. In comparison to essays, research papers are far more detailed. They don't only focus on your writing skills, but your research skills as well, hence the name 'research paper'. When writing a research paper, you don't just share your opinion on the matter, but also include a lot of factual information including any relevant sources.

4 STEPS FOR WRITING A RESEARCH PAPER

Step 1 - Choose and/or Understand Your Topic

Before starting to write your research paper, it's important that you understand what it is exactly that you are writing about. If you were given the great opportunity of being able to pick your own topic to write about, it may be a good idea to choose something that you know you are comfortable to talk about for a long period of time, something that you may even consider yourself to be passionate about.

Step 2 - Conduct Research

Now that you are comfortable with your topic, it's time to do the research. If you're struggling with what exactly you need to research, just think of these five key questions and try to use as many as you can in your research paper: what? why? when? where? and, how? Write down as much information as you can but make sure that your notes are clear and well organised, as this will make putting everything together in the end a lot easier.

Try to find any information on the topic that most people tend to ignore, this may add uniqueness to your paper which is excellent as you want to stand out. Are there any strong debates revolving around your topic, what are they? And why are they so strong? Feel free to share your own personal opinion to the topic, if you have a unique opinion that's even better. Have there been any recent changes to your topic?

Step 3 - Create a draft or as Many as You Need

As many of us have learnt in life, practise makes perfect. After gathering up as much information surrounding your topic as possible, attempt a first draft. Create what your research paper will roughly look like when it's completed. Don't be too concerned about it making sense 100% or looking perfect and having correct spellings and grammar, this is just a draft. You will have the opportunity to develop it later on.

Make sure your draft includes everything you want to include on your research paper, you're able to use or create a research paper outline to help you with this before you start. Make sure everything is in correct order and clear, if you're not too sure don't focus on the introduction for now. Finally, make sure your paragraphs are correctly written. Each paragraph should focus on one idea at a time, in order to be clear and organised for the reader.

Step 4 - Create Your Final Product

Once you're happy with your previous draft, it's finally time to write the actual thing.

Remember to start with a good introduction, here is where you should try to answer the 'what? why? and how?' questions, in order to properly introduce your topic to the reader. Follow up with a well detailed body and text, make sure your paragraphs are organised and you're being clear on the subject. Using an outline for this part, will be extremely helpful if you're stuck. Finally, end with a conclusion. You don't want to end your paper with any questions unanswered or with new information you won't be able to discuss, you want to give the reader a sense of finality.

RESEARCH PAPER EXAMPLE

Introduction

{What is COVID19? What place is most affected and which one is the least affected, according to cases? What do the statistics show?}

Paragraph 1: The dangers of COVID19

{What are the symptoms and time-frame of the virus? Is there a risk of death, according to statistics? How does COVID19 spread?}

Paragraph 2: How to prevent COVID19 and why are there doubts?

{How are the procedures put in place helping to prevent COVID19? How does this change throughout the globe? Why do people believe this virus isn't a real thing and what are the debates surrounding this subject?}

Paragraph 3: How are the protests affecting the cases?

{Where have there been protests and what affect did it have on that specific region?}

Paragraph 4: COVID19 and other diseases

{How are the dangers of COVID19 linked to other diseases? How can COVID19 lead to other diseases and what are they? What do the statistics of those with other diseases who passed away after contracting COVID19 show?}

Conclusion

{Summarise all the different arguments about COVID19, as well as all the figures you have presented in your research paper. Conclude a statement based on the information you have gathered and share which side you believe is right.}

How To Write A Report Paper

Barbara Gastel, Robert A. Day

How To Write A Report Paper:

How to Write a Research Report, Grades 6-8 Mari Lu Robbins,1999-10 Students will learn what a research report is and receive writing prompts to warm up their writing muscles They will investigate reference books and other resources and then choose a topic They will ask important questions Who What When Where Why and How **How to Write and Publish a Scientific Paper** Robert A Day,Barbara Gastel,2006-04-26 Guide on writing and submitting a scientific paper for graduates to professionals *How to Write a Research Report* Kathleen Christopher Null,1998 Students will learn what a research report is and receive writing prompts to warm up their writing muscles They will investigate reference books and other resources and then choose a topic They will ask important questions Who What When Where Why and How

Student Research and Report Writing Gabe T. Wang,Keumjae Park,2016-01-26 This is an invaluable concise all in one guide for carrying out student research and writing a paper adaptable to course use and suitable for use by students independently it successfully guides students along every step of the way Allows students to better manage their research projects Exercises and worksheets break down the research process into small steps and walk students through each stage of the research project Offers real world and lively examples that are attractive and relevant to students Based on twenty years of experience in teaching research techniques to students in a way that avoids the methodology overkill from encyclopaedic and intimidating textbooks Accompanying website includes powerpoint lecture slides for instructors and helpful links to video resources for student Visit www.wiley.com/go/wang/researchreportwriting **How to Structure a Thesis, Report or Paper** Robert P. Ormrod,2022-11-23 How to Structure a Thesis Report or Paper provides concise practical guidance for students to help make their writing more structured at any level It assists students in demonstrating what they have learned in the relevant course or degree programme in a way that is accessible to the supervisor and the examiner Drawing on almost 20 years of supervision experience the author presents the eight sections of a well structured thesis report or paper together with discussing other relevant issues Each chapter provides a detailed description of why each section of a thesis report or paper is structured in the way it is and its relationship to the whole piece of work Good and bad examples are provided throughout the book and there is a focus on key areas such as the six parts of an Introduction and its relationship to the Conclusion how to phrase clear research questions and hypotheses to the use of references and how to make the thesis report or paper easier to read The structure presented in this book can be used to support many courses on the student s entire degree programme as the structure can be adapted by re arranging or deleting sections This book is an invaluable aid to students at all stages in higher education from their first report or paper until they write their final thesis It provides clear guidelines for when students should ask their supervisors for advice and when students can use their own initiative to learn the most It makes writing a thesis report or papers more straightforward **How to Write Reports, Papers, Theses, Articles** John P. Riebel,1972 [How to Write Better Medical Papers](#) Michael Hanna,2019-03-20 This book guides medical

researchers through all stages of transforming their scientific data and ideas into a published paper Many researchers in medicine including the life sciences and health sciences struggle to get their research written and published Manuscripts are typically rejected and or sent back for revisions several times before ever being published One reason for this is that researchers have not received much instruction in the specific subjects and skills needed to write and publish scientific medical papers research methodology ethics statistics data visualization writing revising and the practicalities of publishing Instead of wasting the reader s time discussing trivialities of punctuation spelling etc this book tackles all the major scientific issues that routinely lead to manuscripts getting rejected from the journals The section Preparing covers the range of methodological ethical and practical aspects that researchers need to address before starting to write their paper The section Analyzing reviews commonplace problems in the statistical analysis and presentation and how to resolve those problems The section Drafting describes what to write in all the various parts of a paper the Introduction Methods Results Discussion Abstract etc The section Revising explains and illustrates how to improve the writing style of any manuscript The section Publishing discusses how to navigate the peer review process and all other practical aspects of the publishing phase This book draws on the author s decade of experience as an independent medical writer and research consultant but it is not written merely as the personal opinion of yet another expert The entire book is grounded in the existing scientific and scholarly literature with extensive references and a lengthy annotated bibliography so readers can quickly obtain more information on any aspect they want Thus this book provides a more evidence based scholarly account of how medical scientific papers should be written in order to improve medical communication and accelerate scientific progress After reading this entire book cover to cover medical researchers will know how to write better quality medical papers and they will be able to publish their work in better journals with less time and struggle This book is essential reading for anyone conducting research in clinical medicine life sciences or health sciences

How to Write and Illustrate a Scientific Paper Björn Gustavii, 2017-02-16 A concise and easy to read guide to writing and illustrating a scientific paper detailing examples of good versus bad practice
