intelligence professionals failed to anticipate the wide ranging and unorthodox threats to the nation's security. Nearly a decade and a half later, imaginations in Washington D.C. are still failing. Despite assurances from our leaders that America is safer today than it was before 9/11, the truth is we are still vulnerable. Congressman Michael McCaul has spent years in Washington watching the Obama administration ignore or dangerously underestimate the most pressing threats to the country. Now in *Failures of Imagination: The Deadliest Threats to Our Homeland and How to Thwart Them*, the sitting chairman of the Homeland Security Committee who receives daily intelligence about threats materializing against America depicts in real time the hazards that are closer than we realize. From cyber warriors who can cripple the Eastern seaboard to radicalized Americans in league with Islamic jihadists to invisible biological warfare, many of the most pressing dangers are the ones we've heard about the least and are doing the least about. In this compelling and action-packed narrative, McCaul outlines realistic scenarios that could inflict more damage on the nation than any attack we've yet faced. He then explains how our vulnerabilities were created, why our enemies are actively contemplating them, and what we can do to solve them before it's too late. *Failures of Imagination* offers a call to action for Americans to address these very real and present dangers and the need for the White House, whoever its occupant will be, to combat them with the seriousness and urgency they require.

**Forks, Phonographs, and Hot Air Balloons** Robert John Weber, 1993 How do inventions take shape? How did the inventors of the sewing needle, the hammer, or the wheel find their ideas? Are these creations the result of random events or are hidden principles at work? Using everyday objects most of us take for granted, from forks and Velcro to safety pins and doorknobs, noted cognitive psychologist Robert Weber takes a fascinating look at how our world of inventions came into being and how the mind's problem-solving abilities gave them the forms they have. As an archeologist studies shards of pottery for clues about an ancient culture, Weber examines the many forms of inventions, from stone knives to genetically engineered mice, and finds a rich record of the work of many minds over time, a record of human creativity and problem-solving handed down through the centuries. He offers various methods for analyzing what mental paths might have been taken by these inventive minds. In the test for design, for example, he ponders how an item would work if various components were shuffled or constructed differently, revealing how the optimal shape of the invention was discovered. He

challenges the reader to engage in thought experiments to explore how the horse drawn cart the waterscrew or the fork might have taken shape over many years through the efforts of successive inventors and adaptors In stripping these simple artifacts to the bone Weber finds a hidden intelligence at work in everyday objects as well as recurrent heuristics basic principles or rules of thumb that are common among many of our most successful inventions heuristics powerful enough to generate endless new ideas Weber ranges across the work of Archimedes Leonardo da Vinci the Wright brothers as well as grade school children who have won national awards for their inventions revealing that the same principles are at work in the discoveries of all of them Basic principles of invention he writes govern how we think solve and manipulate ideas whether mechanical or mental real or mythological Weber s playful original and insightful look at the inventions around us reveals a hidden intelligence in everything from screws to tea bags to synthesizers an intelligence based on principles of creativity and problem solving His fascinating account sheds light on how the mind hones its most original thoughts and products and provides a field guide for how we can tap into our own creativity      Seal Island Kate Brallier, 2007-04-01 Cecil Hargrave
