Procurement Woes Jeffrey F. Collins, 2023-12-15 This book challenges the perceived underlying causes and culprits of the ongoing challenges in Canadian defence procurement arguing that although headlines often put the blame on the political leadership the defence procurement bureaucracy ongoing pressures in the defence industry and continuous demands placed on Canada though its alliances also carry a large part of the responsibility Focusing on four main case studies the Fixed Wing Search and Rescue Plane the Joint Support Ships the Medium Support Vehicle System and the Halifax Class Modernization the author offers a comparative analysis of how these ongoing procurement efforts were dealt with by different

administrations from Jean Chr tien and Paul Martin to Stephen Harper The Bombardier Story Larry MacDonald, 2012-11-26 The story of the company that was founded by the inventor of the snowmobile In 1942 Joseph Armand Bombardier invented the snowmobile and founded his company to manufacture them From its humble beginnings as an entrepreneurial company in rural Quebec led by an enterprising inventor Bombardier Inc has emerged as a global leader in the transportation industry This book tells the fascinating tale of this remarkably well managed company that has enjoyed spectacular growth in its chosen markets through strong leadership and management strategy succession planning strategic diversification and turnaround and acquisition artistry The fascinating story of the world s largest rail manufacturer for both railway and subway Reveals why Bombardier Inc is a multi faceted global company yet nobody knows their name Written by Larry MacDonald the author of Nortel Network The Bombardier Story shows how invention and entrepreneurship management and leadership smooth succession planning and turnaround and acquisition built this global powerhouse

Soft Landing Andrew R. Thomas, 2011-12-20 Soft Landing Airline Industry Strategy Service and Safety covers the immediate past present and future of the airline industry and its effects on consumers and the economy Aviation receives a disproportionate amount of news coverage in the popular press not to mention chatter at cocktail parties and workplaces around the world And why not Aviation represents a sector of the U S economy for example exceeded in size only by the real estate healthcare and automotive industries Furthermore hundreds of millions of people fly each year including 80 million Americans So we all have airline stories experiencing a delay and losing a business deal spending a night or three in the airport dealing with ornery airline personnel losing money on airline stocks or being involved in a near miss Or as George

Carlin more accurately put it a near hit But things might be on the upswing Knocked to its knees by 9 11 and a decade of falling revenue and rising losses the industry's flying cheap strategy and organizational efficiencies based partly on outsourcing have appear to have helped passengers and profitability return As this book explains we can look forward to better technology and infrastructure speedier and easier travel more effective and less invasive security measures and more jobs in the air and on the ground Turbulence is always a possibility Rising fuel costs economic uncertainty and future terror attacks could cause tumult once again Plus airline companies intend to charge us extra for everything from the weight of our own bodies to use of the bathroom But as the industry has discovered we'll put up with that and more if we can make it to our destinations with bags intact and a smaller dent in our wallets Soft Landing will Sort out the promise and perils facing the airlines Analyze and articulate the potential impact of changes in the aviation industry on passengers airports governments the global economy and the airlines themselves Give airline passengers worldwide an idea of what's ahead when it comes to airline service security and technology

War Machines Timothy Moy, 2016-03-01 The American military establishment is intimately tied to its technology although the nature of those ties has varied enormously from service to service The air force evokes images of pilots operating hightech weapons systems striking precisely from out of the blue to lay waste to enemy installations The fundamental icon for the Marine Corps is a wave of riflemen hitting the beaches from rugged landing craft and slogging their way ashore under enemy fire How did these very different relationships with technology develop During the interwar years from 1920 to 1940 leaders from the Army Air Corps and the Marine Corps recreated their agencies based on visions of new military technologies In War Machines Timothy Moy examines these recreations and explores how factors such as bureaucratic pressure institutional culture and America's technological enthusiasm shaped these leaders' choices The very existence of the Army Air Corps was based on a new technology the airplane As the Air Corps was forced to compete for money and other resources during the years after World War I Air Corps leaders carved out a military niche based on hightech precision bombing The Marine Corps focused on amphibious firstwave assault using sturdy graceless and easy to produce landing craft Moy's astute analysis makes it clear that studying the processes that shaped the Army Air Corps and Marine Corps is fundamental to our understanding of technology and the military at the beginning of the twenty-first century

The Airplane in American Culture Dominick Pisano, 2003 A fascinating account of America's relationship with the airplane

French Strategic and Tactical Bombardment Forces of World War I René Martel, 2007 Allen Suddaby's careful translation of this long out of print work is enhanced by his son Steven's recent scholarship on Great War bombing campaigns The original 1939 text is supplemented with the results of 65 years of research and benefits from the knowledge of several experts in the field who were consulted during preparation of this edition
